MANDATORY · FOR EVERY AGENT THAT BUILDS A SCREEN (AGENT CODE AND AGENT GIT)

Spareway — Design System

One simple, dark, Haulix-style look that any truck owner or loader understands at first sight — in English or Hindi with one tap. Every screen follows this document and its Haulix reference picture.

STATUS	VISUAL SOURCE	VERSION
MANDATORY — a phase isn't done until its screens pass section 13	Haulix shot on Dribbble (7 screens inside)	Final v6 · 29 Oct 2026

0. How to use this document

- **Look and wording** come from here; **behaviour** from the Architecture PDF; **exact names** from the Engineering Reference.
- The Haulix screens (section 2, source `https://dribbble.com/shots/27229691-UI-UX-Design-for-Logistics-Dashboard-Haulix`) are the visual target. We copy their dark style but make everything **simpler** (section 1).
- Read sections 1–6 and 10–13 every phase, plus the screen sections of your phase.
- **MUST** = required, merge blocked without it. **SHOULD** = do it unless DECISIONS.md says why not.

Phase part	Your screens
0·Code	F1, F2, F3, F4, F5, F6 → sections all (read fully)
1·Code	F7, F8, F9 → sections 2–6, 7.4–7.6, 13
1·Git	F10, F11, F12 → sections 2–6, 7.7, 8, 9, 13
2·Code	F13, F14, F15 → sections 2–6, 7.8, 7.9, 7.11, 8, 13
2·Git	F16 → sections 2–6, 7.10, 8, 13
3·Code	F17, F18 → sections 2–6, 7.12, 13
3·Git	F19, F20 → sections 2–6, 7.13, 7.14, 13
4·Code	F21, F22 → sections 2–6, 11, 12, 13
4·Git	F23 → sections 2–6, 7.15, 13

1. Simple-UI rules (MUST)

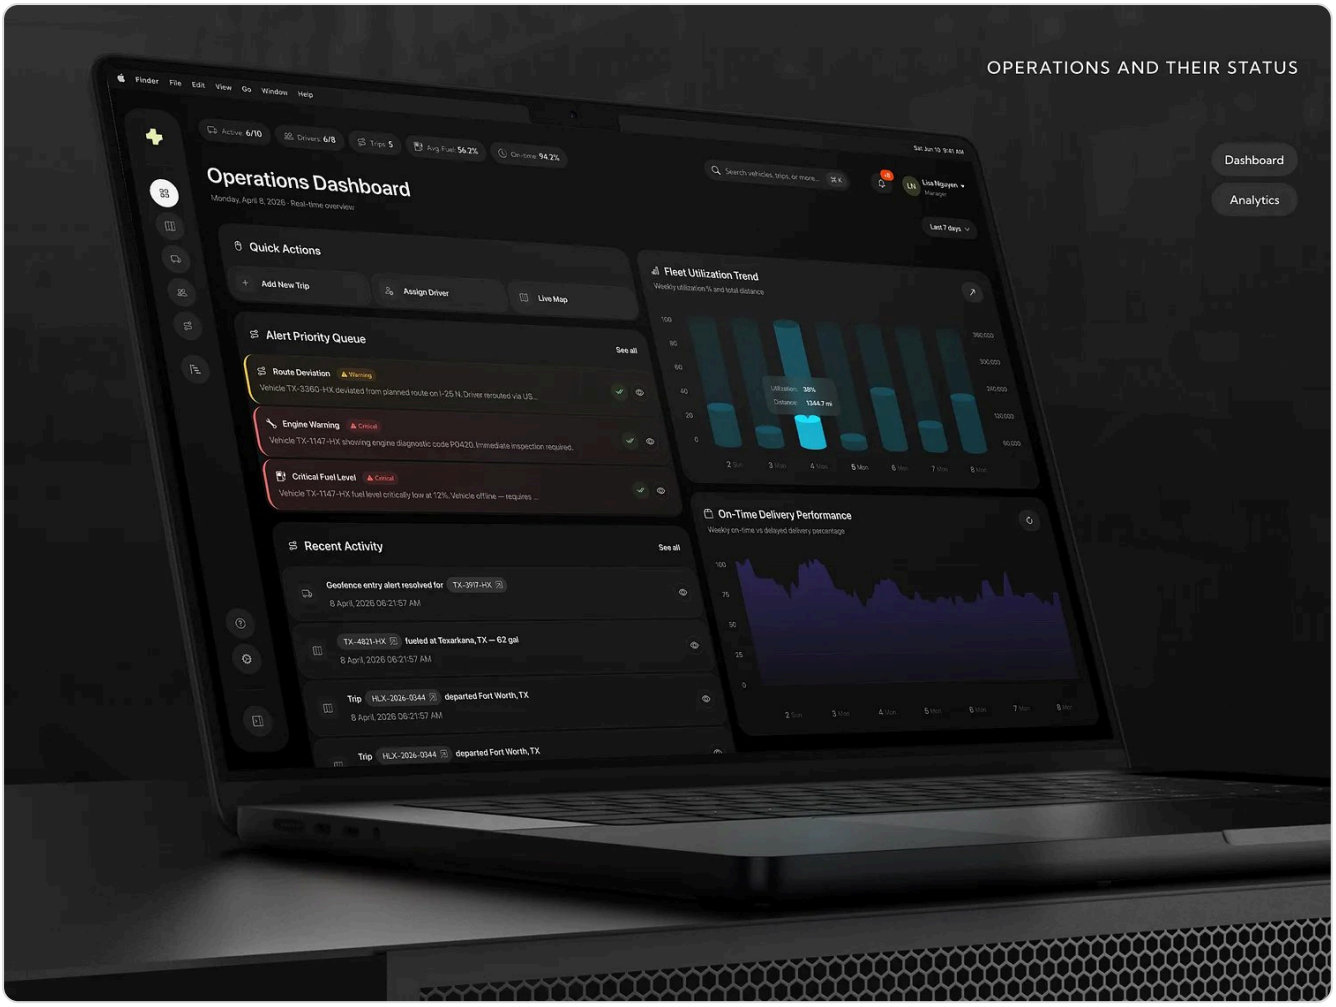

Our users are small truck owners, drivers and loaders — often on a phone, in the sun, in a hurry, sometimes not used to apps. Design for them.

1. **One main thing per screen**, one lime main button per screen or sheet. Other buttons are plain.
2. **Big**: body text 15 px+, buttons 48 px high (main button 52 px; loader page 56 px), tap areas ≥ 48 × 48 px.
3. **Plain words** from the glossary (section 10): “Space used”, “Weight left”, “Profit”, “Balance OK”. No jargon, no abbreviations except km, kg, ft, ₹.
4. **Icon + word** on every button and tab. Never an icon alone (except close ×, with a label for screen readers).

5. **At most 3 numbers per card.** More detail goes behind “More details”.
6. **Always show the next step**: the trip page has a NextStepCard (“Next: plan the load” + button) and numbered StepTabs with ✓.
7. **Colour + word**: green = good, amber = check this, red = problem — always with a word or icon, never colour alone.
8. **No dense widgets**: no gauges, no dual-axis or stacked charts, no tiny tables on phone. One simple bar chart per card at most.
9. **Hindi with one tap** (section 6) — every screen must look right in Hindi (longer words).
10. **Phone first**: works at 375 px with no sideways scrolling; laptop just shows more side by side.
11. **Forgiving**: confirm before anything that can't be undone; never lose typed text on an error; clear message + what to do.
12. **Honest**: Sample / Simulated / AI / Estimated badges where section 12 says.
13. **Only tokens and components from sections 3–5**; dark only; lucide icons; no Haulix name or logo; no buttons for things not built yet.

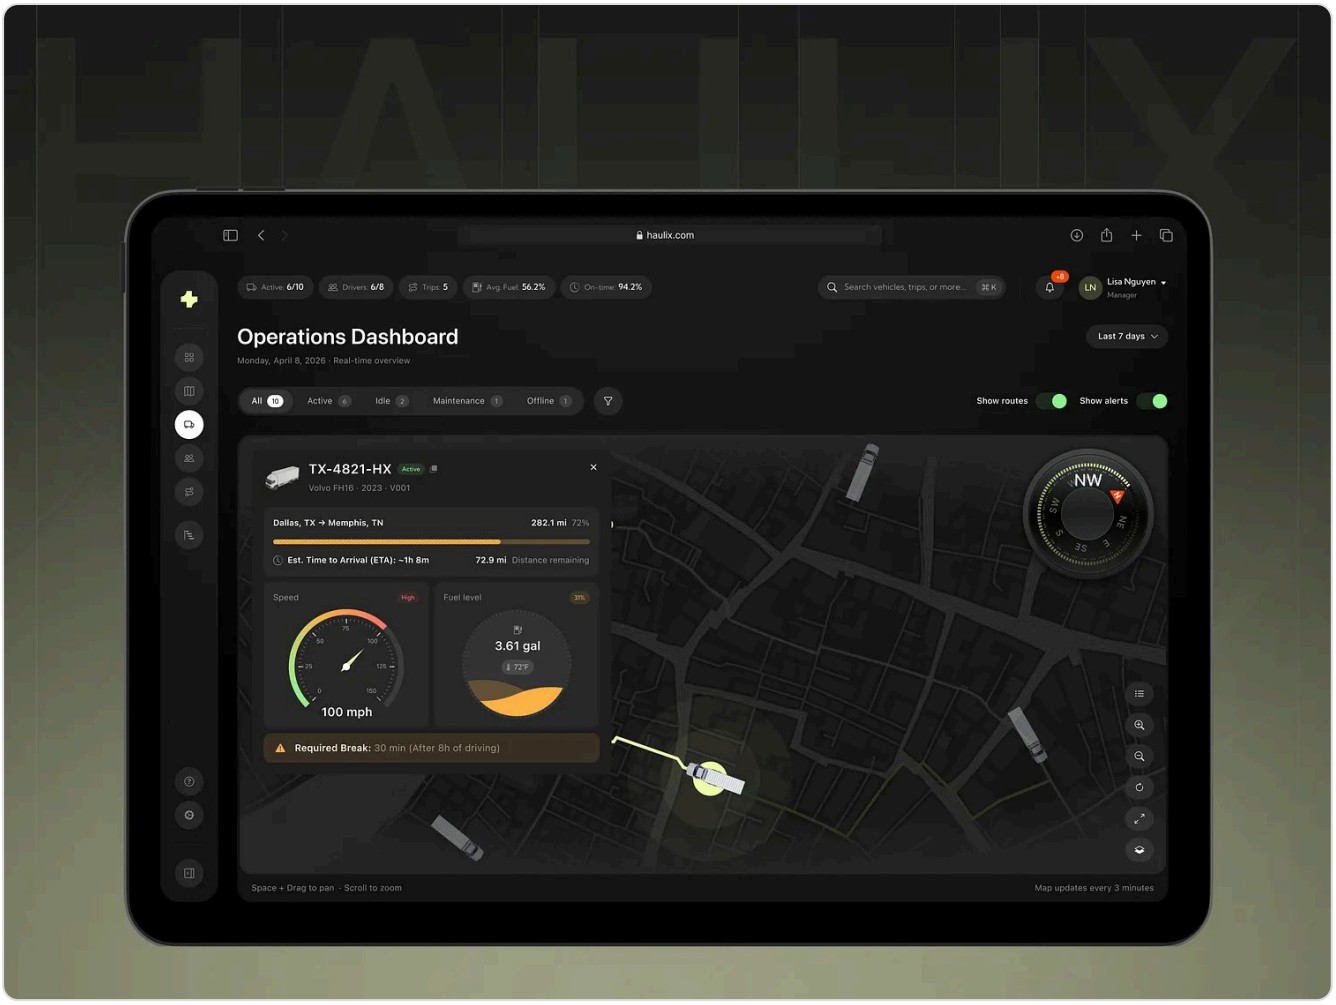

2. The Haulix reference screens — copy the look, simplify the content

Source: `https://dribbble.com/shots/27229691-UI-UX-Design-for-Logistics-Dashboard-Haulix`.

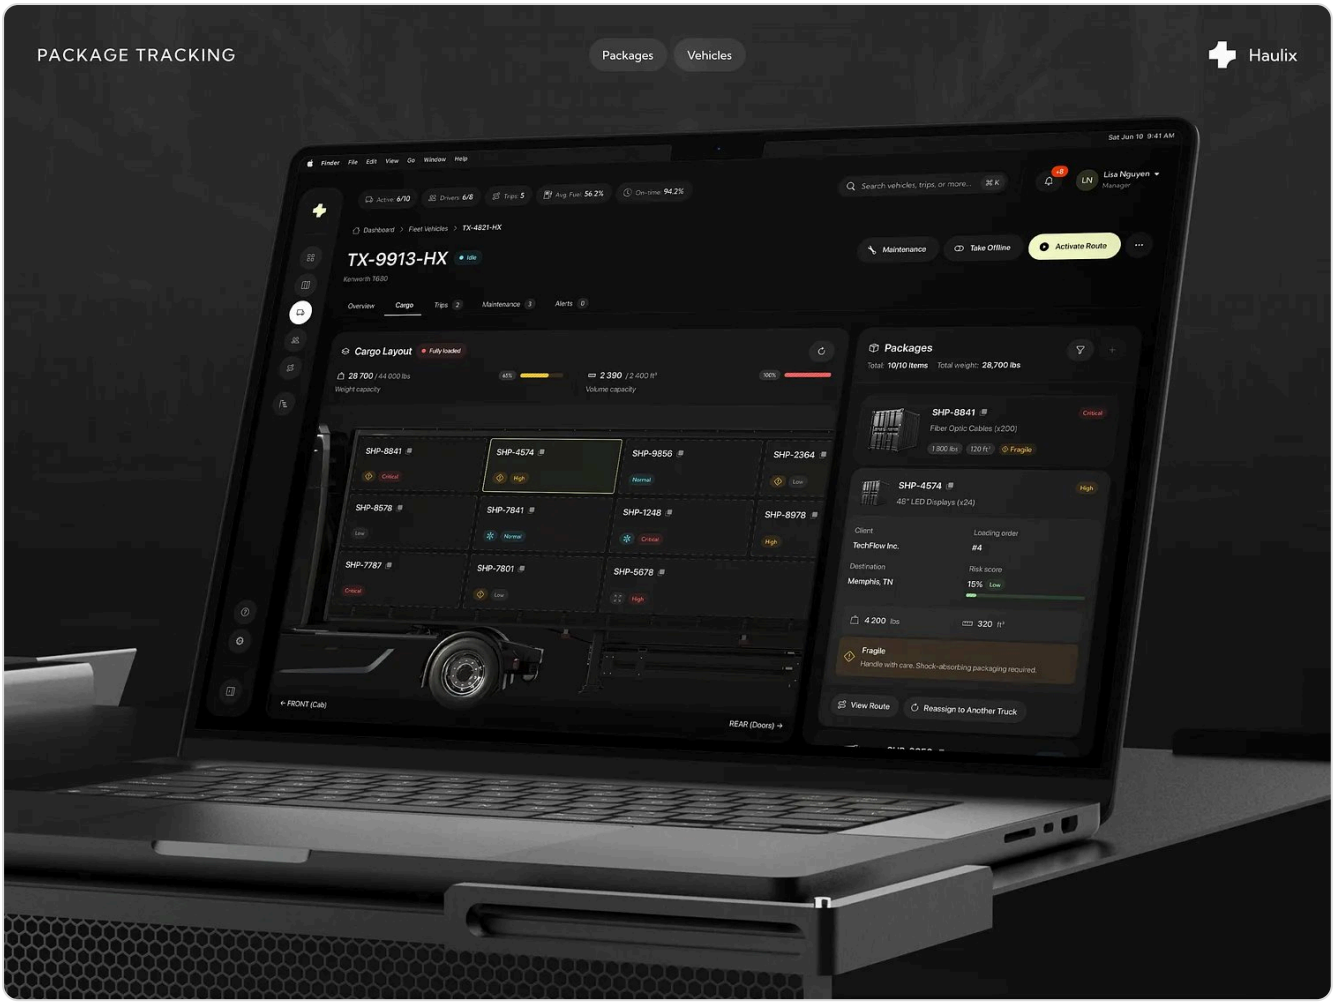

Haulix reference 1 — Operations Dashboard

In the picture	What we do
Floating rounded icon rail, dark cards, lime accent, tinted alert cards	Keep
Stat pills, dual-axis cylinder chart, area chart	Simplify: 3 BigTiles on Home, one simple bar chart
Alert cards with left colour bar	Keep for Problems, one line each + “Done” button

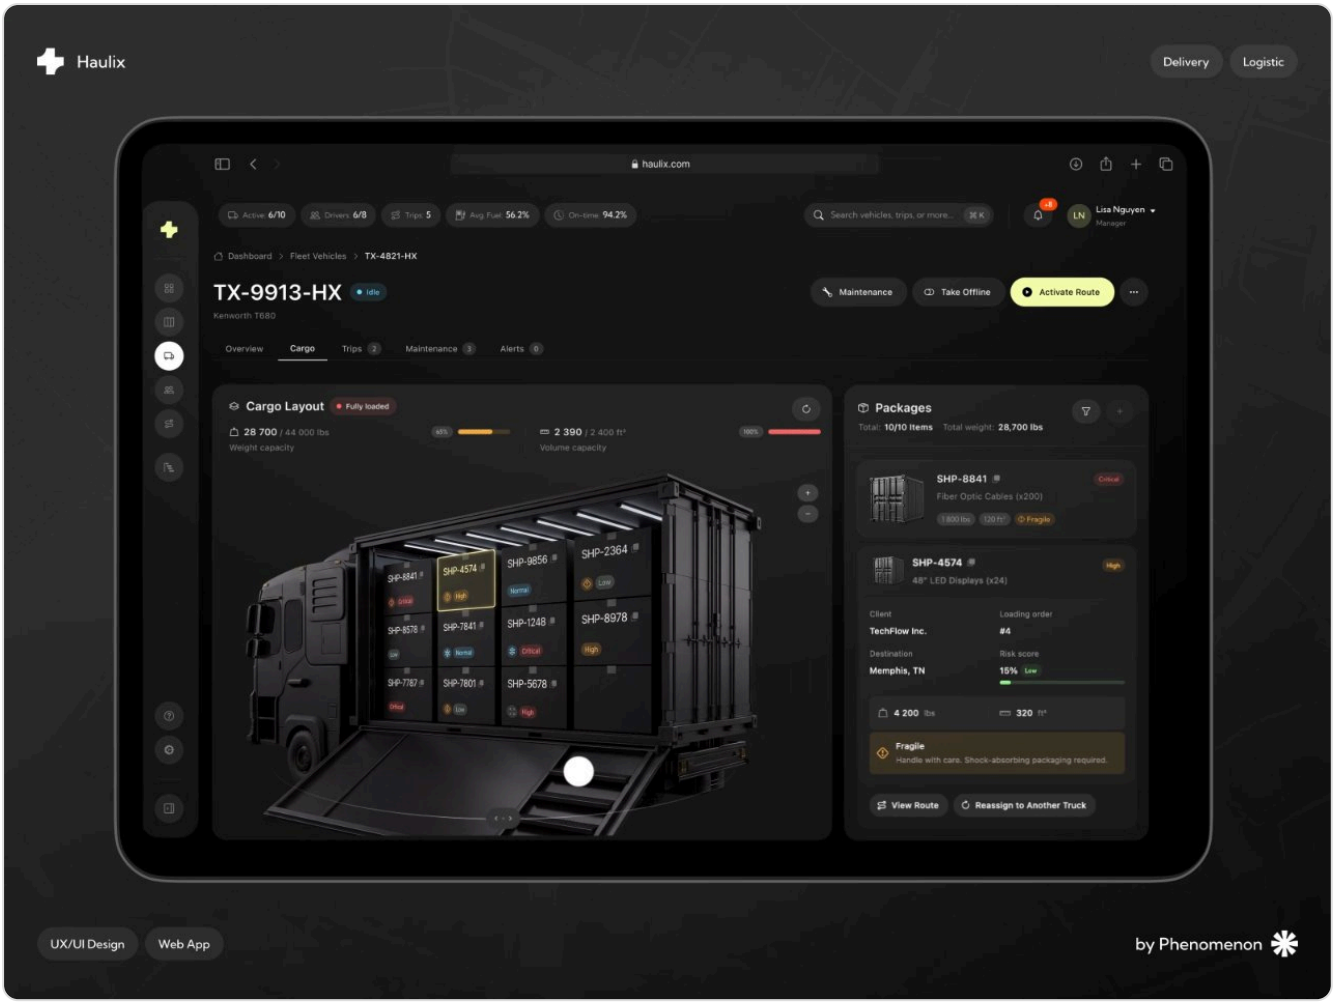

Haulix reference 2 — Live Fleet Map

In the picture	What we do
Full-bleed dark map, filter chips with counts, round controls	Keep
Speed and fuel gauges	Replace by one plain line “Speed 52 km/h · Fuel 54%”

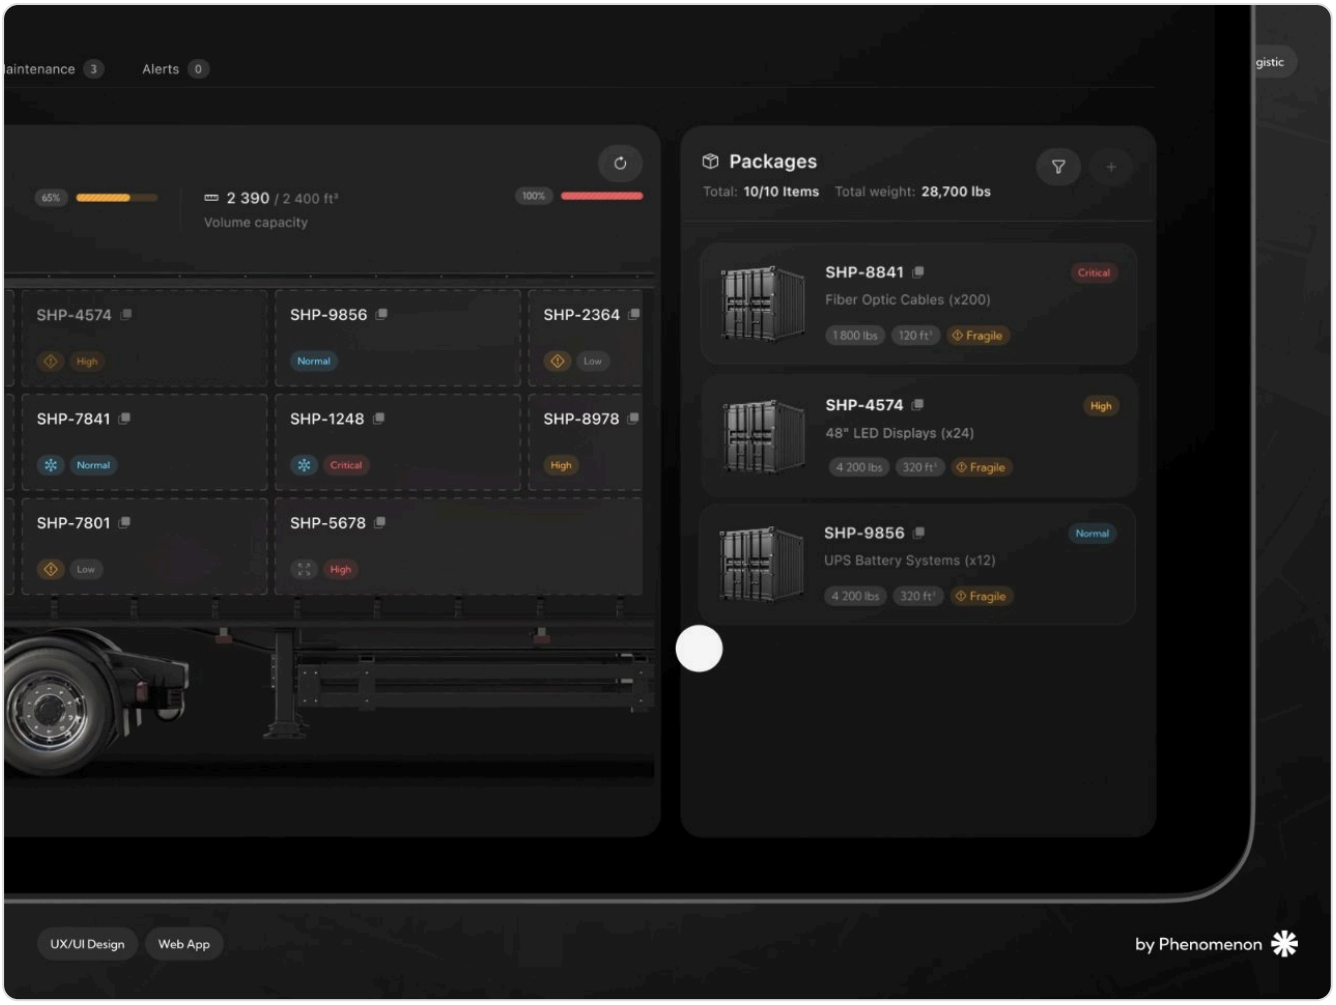

Haulix reference 3 — Vehicle detail · Cargo / Package tracking

In the picture	What we do
Big ID + status chip + model, pill tabs with counts, one lime action	Keep for truck and trip pages
Packages list with expanded card	Keep, bigger text, fewer fields

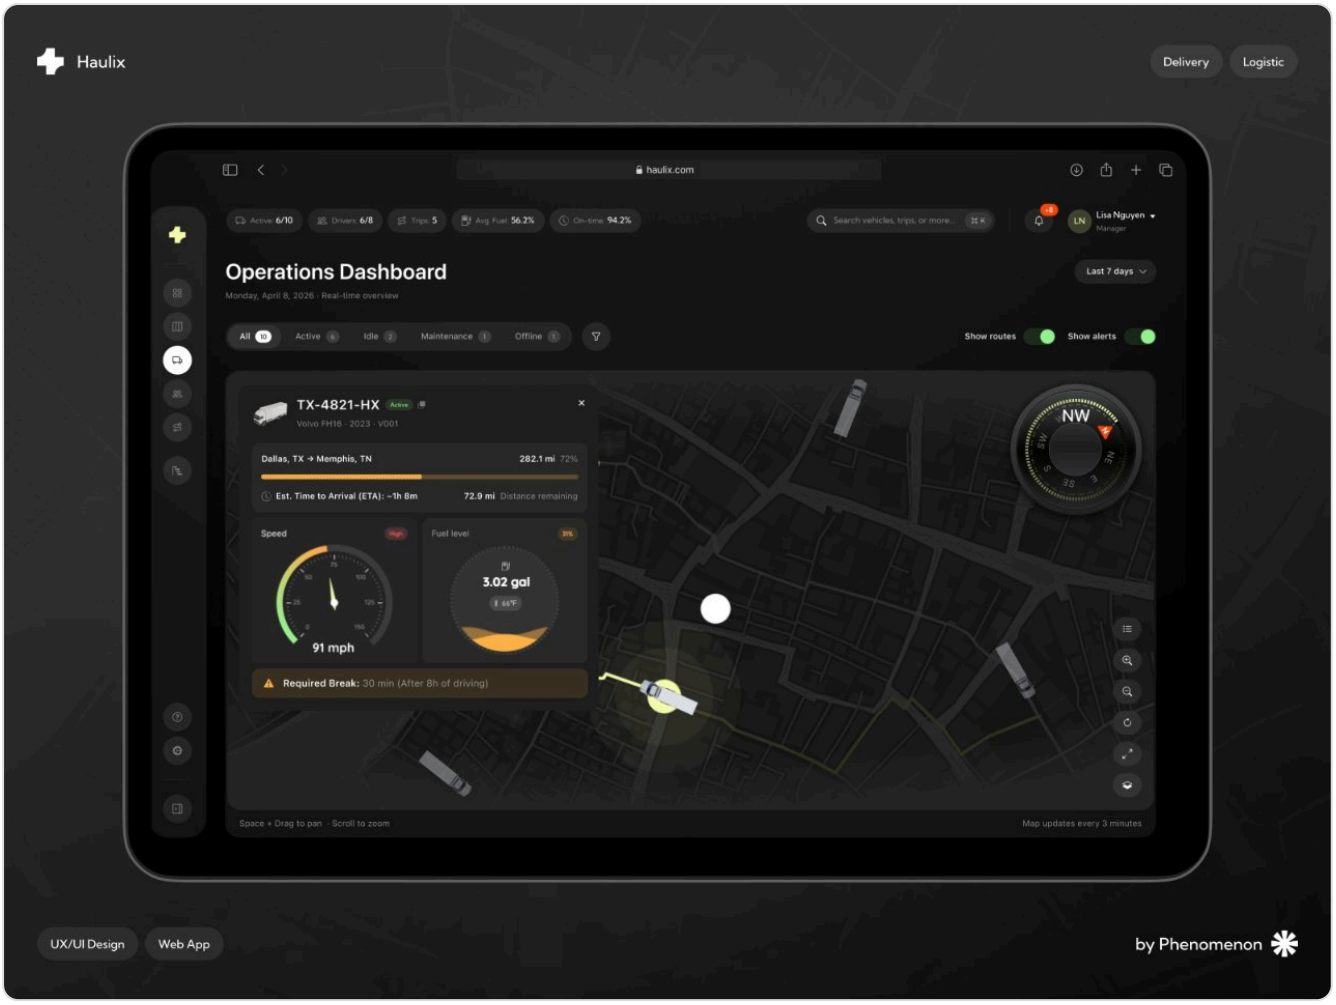

Haulix reference 4 — Vehicle detail with 3D truck Cargo Layout + Packages detail

In the picture	What we do
3D truck with open doors and boxes, “Fully loaded” chip, weight + volume bars	Keep — our main wow screen
Risk score, many small chips	Drop; show stop colour, name, kg

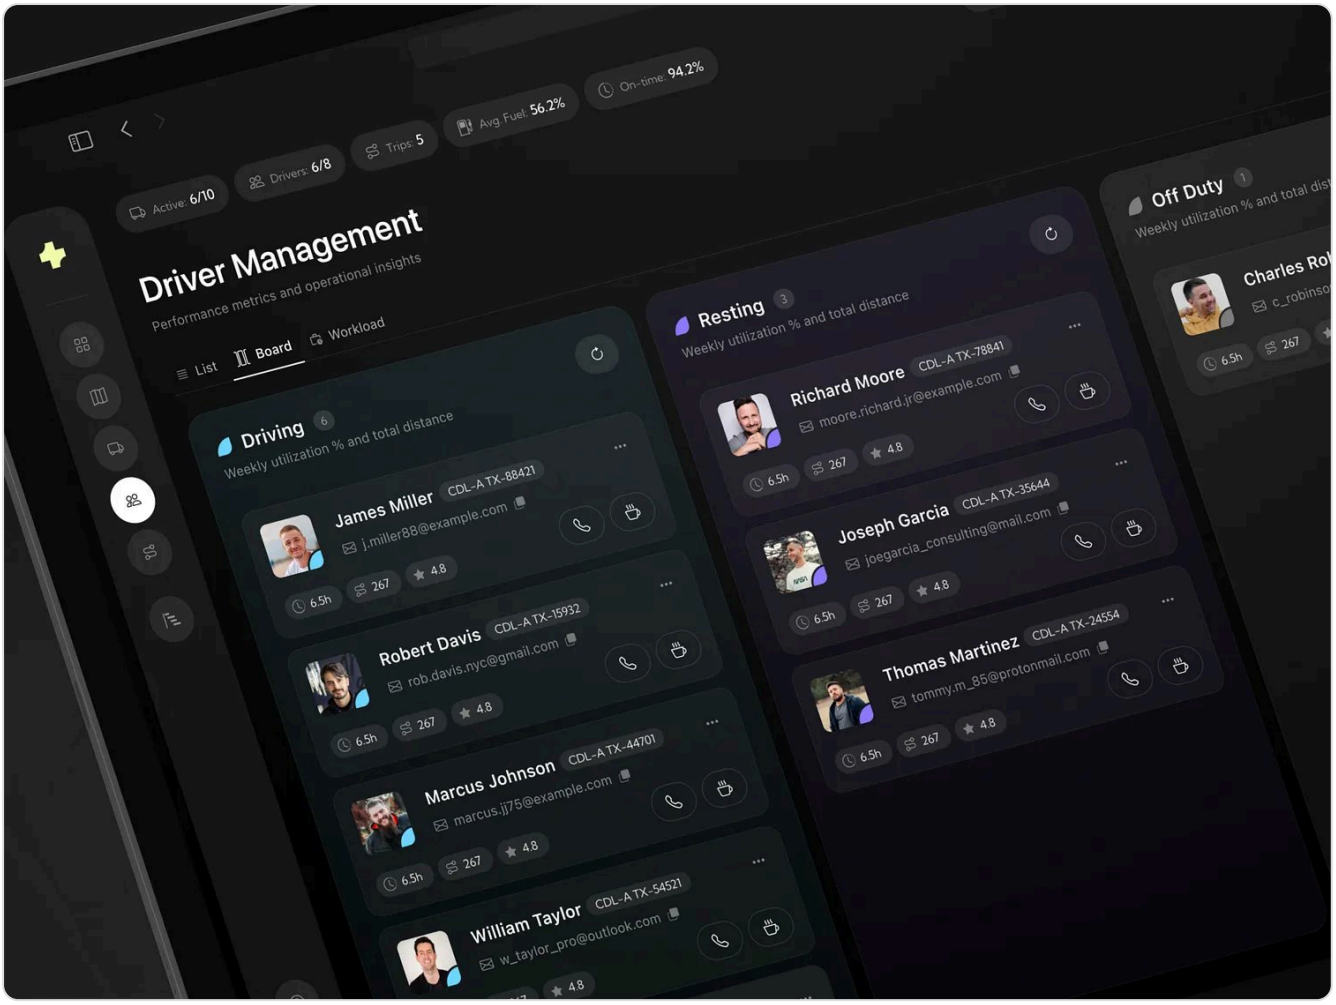

Haulix reference 5 — Cargo grid + Packages list close-up

In the picture	What we do
Dashed cells, priority chips, package cards with thumbnail	Keep style for top view and package cards
lbs / ft³	Use kg / m³ and ft for trucks

Haulix reference 6 — Live map with selected-truck card, gauges, break banner

In the picture	What we do
Selected-truck card floating over the map, progress bar, ETA, amber break banner	Keep
Compass and gauges	Drop compass; numbers in plain text

Haulix reference 7 — Board view (columns by status) with person cards

In the picture	What we do
Board with columns by status, person cards with call buttons	Keep for Trucks and Trips boards (laptop); list on phone
Many stat chips per card	Max 2 chips

3. Tokens (exact values — Tailwind `@theme` in `src/index.css`)

Token	Value	Use
canvas · rail · surface · surface-2 · surface-3	#0a0a0b · #121214 · #141416 · #1b1b1e · #232327	page · rail/tab bar · cards · inputs/tiles · hover/chips
line · line-strong	white 7% · 12%	1 px borders
ink · ink-2 · ink-3	#f2f2f3 · #a1a1a8 · #6b6b73	text · secondary text · hints only (≥ 13 px)
accent · accent-ink · accent-soft	#e3f58c · #121212 · lime 12%	main button, active item, selection, focus ring
ok · warn · crit · info · violet	#4ade80 · #f5a524 · #ef4444 · #22d3ee · #7c6cf0	good · check · problem · info · AI badge
stop-1 … stop-8	#e3f58c #22d3ee #f5a524 #a78bfa #fb7185 #34d399 #60a5fa #f472b6	colour of each drop stop (chips, 3D boxes, map pins)
radius	card 20 · tile 14 · button/input 14 · chip full	

Text role	Size / line	Weight	Use
page-title	26 / 32 (phone 22 / 28)	600	Page title, truck number
section-title	18 / 24	600	Card and sheet titles
body	15 / 22	400	All normal text
label	13 / 18	500, ink-2	Field labels, small captions
big-number	32 / 38 (hero 44 / 48)	600, tabular	BigTile and earnings numbers
button	16 / 20	600	All buttons
loader	step 26 / 32 · text 19 / 28 · buttons 20	600 / 500	Loader page

- Font stack `'Inter Variable', 'Noto Sans Devanagari', system-ui, sans-serif`. Hindi: +4 px line height, no uppercase, weight ≥ 500 under 15 px.
- Spacing on a 4 px grid: 4, 8, 12, 16, 20, 24, 32. Card padding 20 (phone 16), gap 16 (phone 12).
- Icons (lucide): 20 in buttons/tabs, 24 on BigTiles and the loader page. Motion: 200 ms ease; instant with reduced motion or low-data.

4. Layout

Where	Layout
Laptop (≥ 1024 px)	Floating icon rail (64 px, labels on hover: Home, Trucks, Trips, Map, Loads, Earnings, Settings at bottom) · top bar (page title, search, **Hindi button**, bell with count, avatar) · content in cards, max width 1440
Phone (< 640 px)	Top bar (logo, title, Hindi button, bell) · bottom tabs Home · Trucks · Trips · Map · More (Loads, Earnings, Settings, Low-data, Log out) · one column · sheets full screen with the main button fixed at the bottom
Sign-in pages	No shell; centred card 420 px; logo; Hindi button top-right
Loader page	No shell; one column max 480 px; one task per screen; Hindi button top-right

Page type	Structure	Used by
Home	Greeting · 3 BigTiles · quick buttons · Problems · Recent activity · This week	Home
List / board	Title + count + lime Add · filter chips · cards (board on laptop, list on phone)	Trucks, Trips, Loads
Detail with steps	Back · big title + status · main status button · NextStepCard · StepTabs · step content	Trip page
Detail with tabs	Back · big title + status · actions · tabs	Truck page
Workspace	Big canvas (3D or map) + side panel (phone: canvas on top, panel below)	Load plan, Route, Extra loads
Full map	Map under the shell, chips and card floating	Live map
Form	Cards with fields, sticky Save	Settings, Post a load

5. Components (`src/components/common`, Phase 0)

Component	What it is	Rules
Card, CardHeader, PageHeader	Dark card (surface, 1 px line, radius 20); header icon + title; page title + subtitle + actions	Max 2 levels of nesting
MainButton · PlainButton · IconButton · GoogleButton	Lime 52 px with icon + word · outlined 48 px · 48 px round with label · white "Continue with Google"	One MainButton per view; loading keeps its width
LanguageButton	Pill "हिंदी" when English is on, "English" when Hindi is on; 40 px high, accent outline	Section 6
BigTile	Icon 24 · big-number · one-line label · optional colour state	Max 3 per row; tap opens the list behind it
NextStepCard	Accent-soft card: "Next: plan the load" + one MainButton	Always one; disappears when the trip is done
StepTabs	Numbered tabs 1–6 with icon + word, ✓ when done, current underlined lime; scroll on phone	Only built steps appear
TextField · NumberField (with unit) · Select · Switch (with one-line help)	48 px fields, label above, help under, error in red with icon	Unit switch ft⇄cm on size fields
Chips: Status · Stop · Badge	Status with word + colour dot · StopChip: number in stop colour + name · Sample/Simulated/AI/Estimated/Public/Loader badges	
Bar (progress / capacity)	Label + % + bar; green < 70%, amber 70–90%, red > 90%	Always shows the % as text
SimpleBarChart	One series, labelled bars, no grid clutter	Sample badge when demo data
ProblemCard	Left colour bar, icon, one-line title, chip (truck/trip), time, "Done"	From kind + meta templates
Sheet · Dialog · Toast	Side sheet 480 px / full screen on phone · confirm dialog · toast bottom (phone top)	Esc closes unless typed text would be lost
EmptyState · ErrorState · Skeleton · FullScreenMessage	Icon + one line + one button · same with Retry · grey shapes · centred message	Every data area has all four
QrCard	Black-on-white QR 220 px + link + Copy + WhatsApp	
MapView + TruckMarker + StopPin + RouteLine	MapLibre wrapper (style from env), fit to points, zoom/re-centre controls, markers	Attribution always visible
CheckItemsSheet (Phase 3)	Editable suggested cargo rows + required drop stop + kg + "Add N items"	Nothing saved before confirm

6. The Hindi button

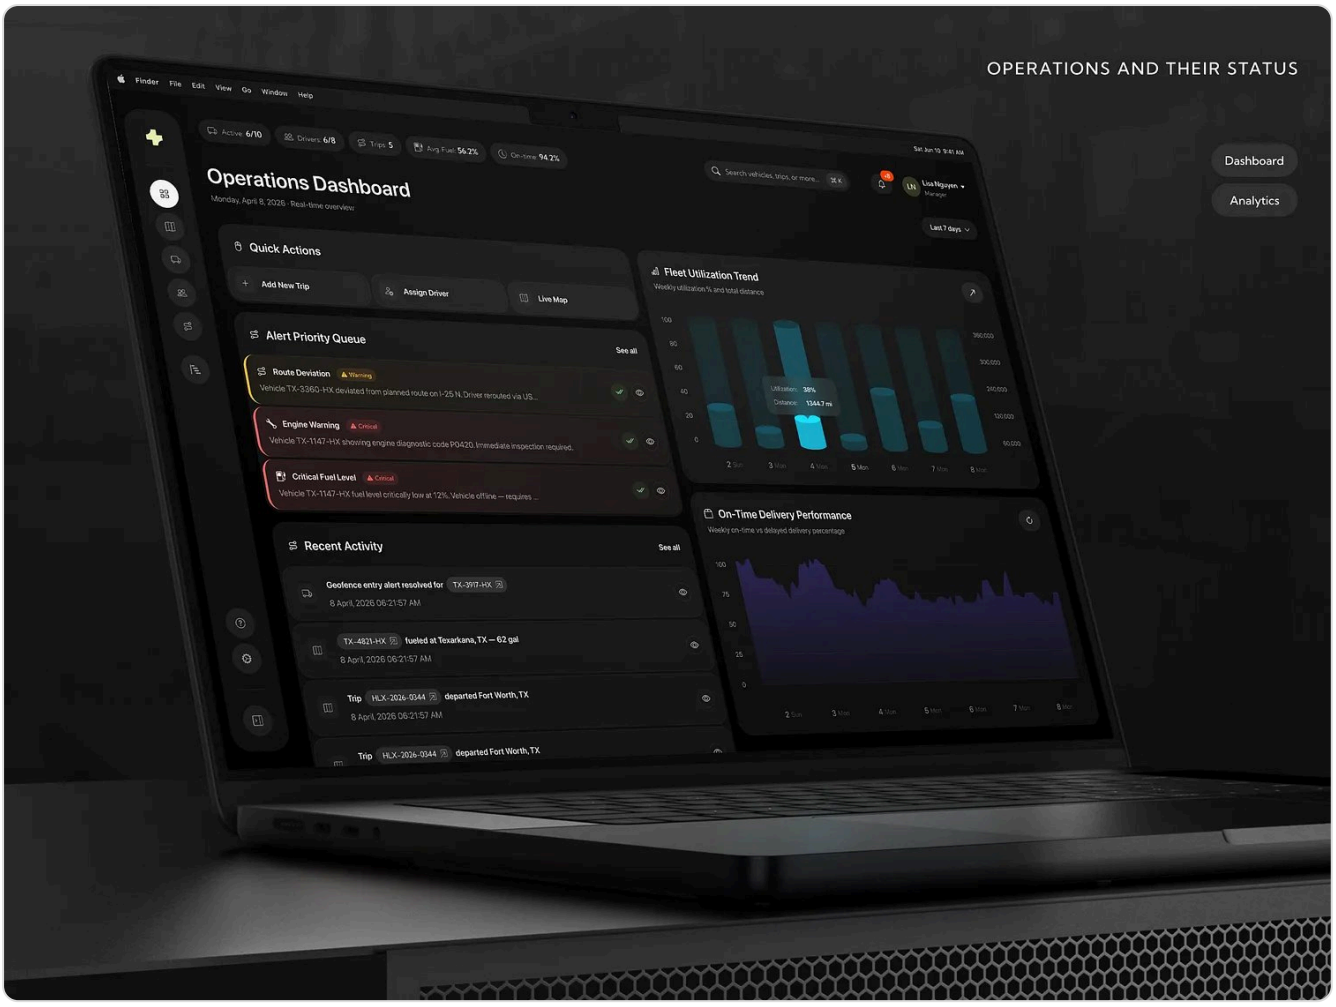

- **Where**: top bar (laptop and phone), every sign-in page (top-right), loader page (top-right). Always visible — never hidden in a menu.

- **What it does**: one tap switches **everything** on screen instantly — labels, buttons, messages, empty states, charts, WhatsApp texts and all demo data (places, cargo, trucks, clients, drivers, problems, activity) via `td()` and kind + meta templates. No reload.
- **Remembers**: owner → profile `preferred_lang`; loader → device. Default for new visitors: browser language (Hindi if it starts with “hi”), else English.
- **Looks**: shows the language you will switch *to* (“हिंदी” or “English”) with a small Languages icon.
- **Check**: every new screen is tested in both languages at 375 px; Hindi must not overflow buttons, chips or tabs.

7. Screens

Each screen: the Haulix picture to copy, then what it shows and how to keep it simple. Behaviour: the Architecture feature named in brackets.

7.1 Sign-in pages (F2) · 0·Code

Haulix reference 1 — Operations Dashboard — dark card style

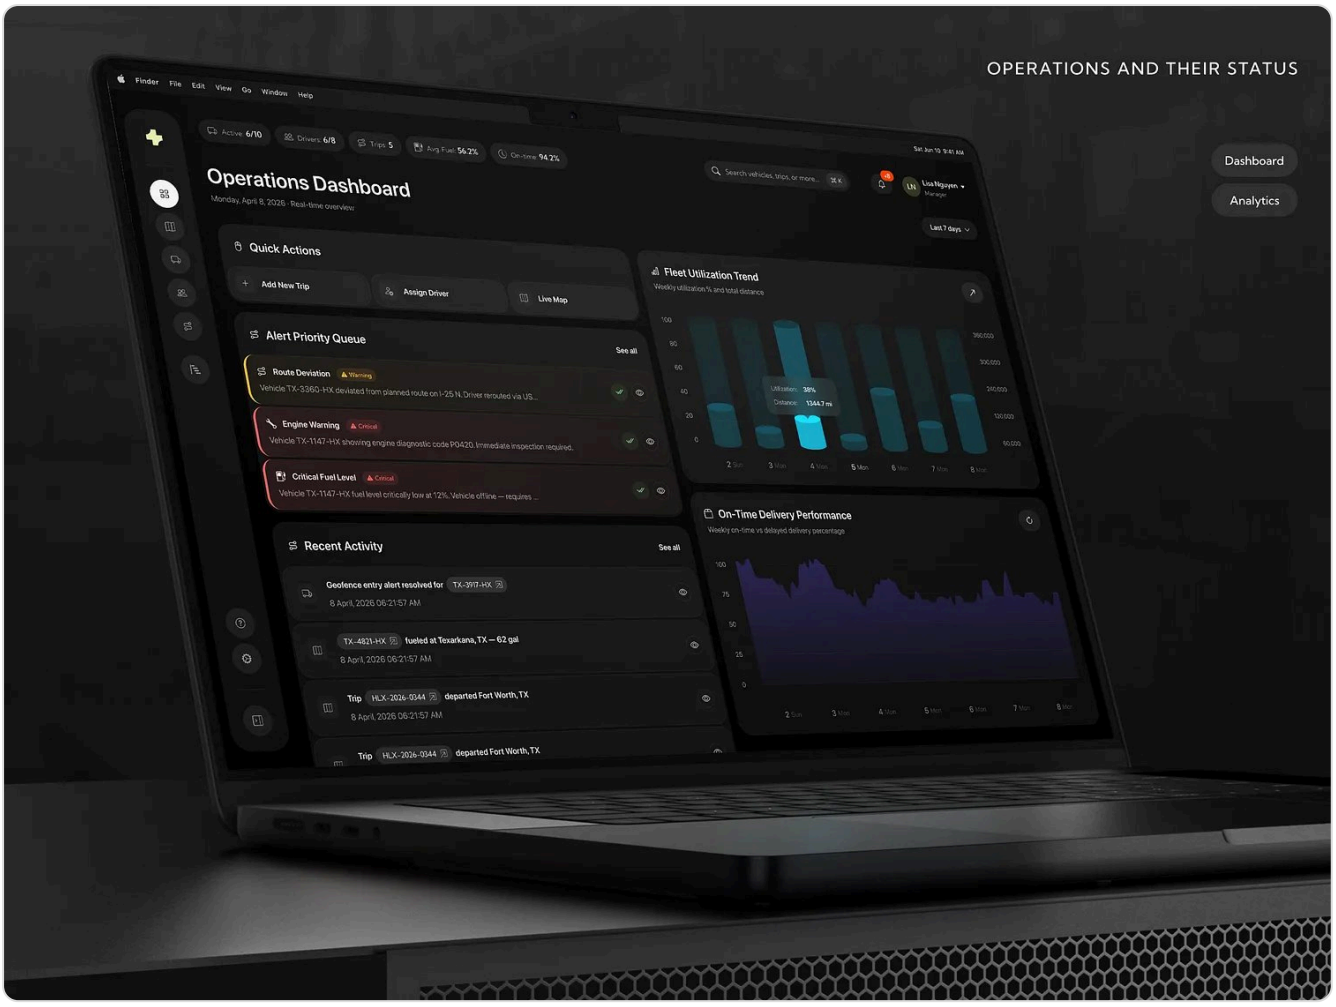

Part	What it shows	Keep it simple
Card	Logo, title “Log in to Spareway”, Continue with Google, “or”, email, password, Log in (lime), Forgot password · Create account	Max 5 fields on Sign up; show/hide password eye
Check your email	Mail icon, “We sent a link to you@…”, Resend (after 60 s), Back to log in	Same card
Errors	Plain line above the button (Engineering Reference 5)	Never clear typed text

7.2 App shell (F4) · 0·Code

Laptop layout as Haulix reference 1; phone layout as section 4.

Part	What it shows	Keep it simple
Rail / bottom tabs	Home · Trucks · Trips · Map · Loads · Earnings (laptop); Home · Trucks · Trips · Map · More (phone)	Labels always on phone; tooltips on laptop
Top bar	Title · Search (trucks by number, trips by code) · Hindi button · bell (problems) · avatar menu	Search results as a simple list

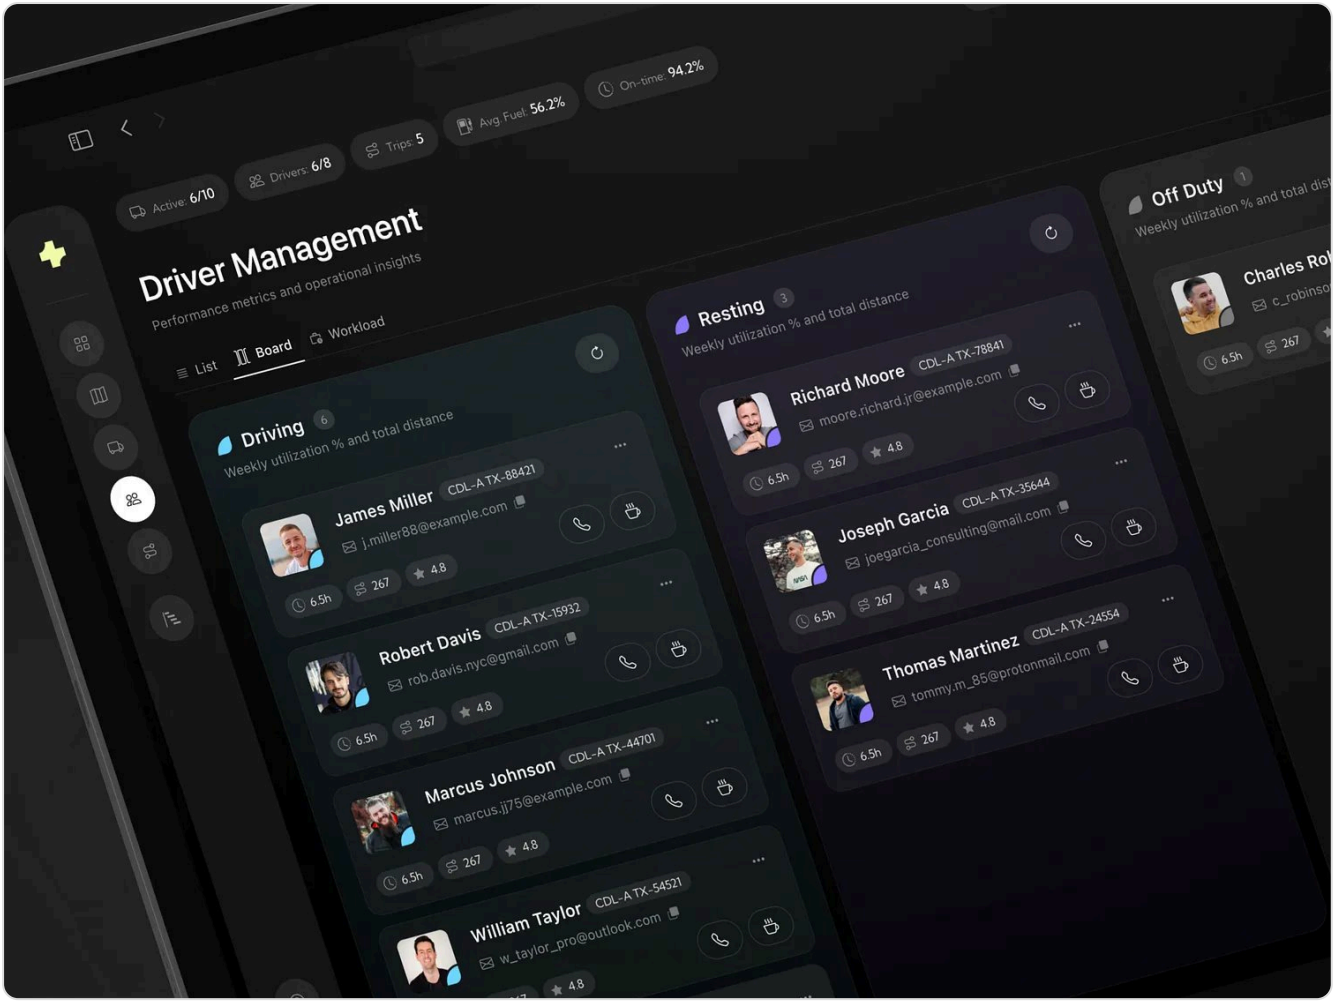

7.3 Home (F5) · 0·Code

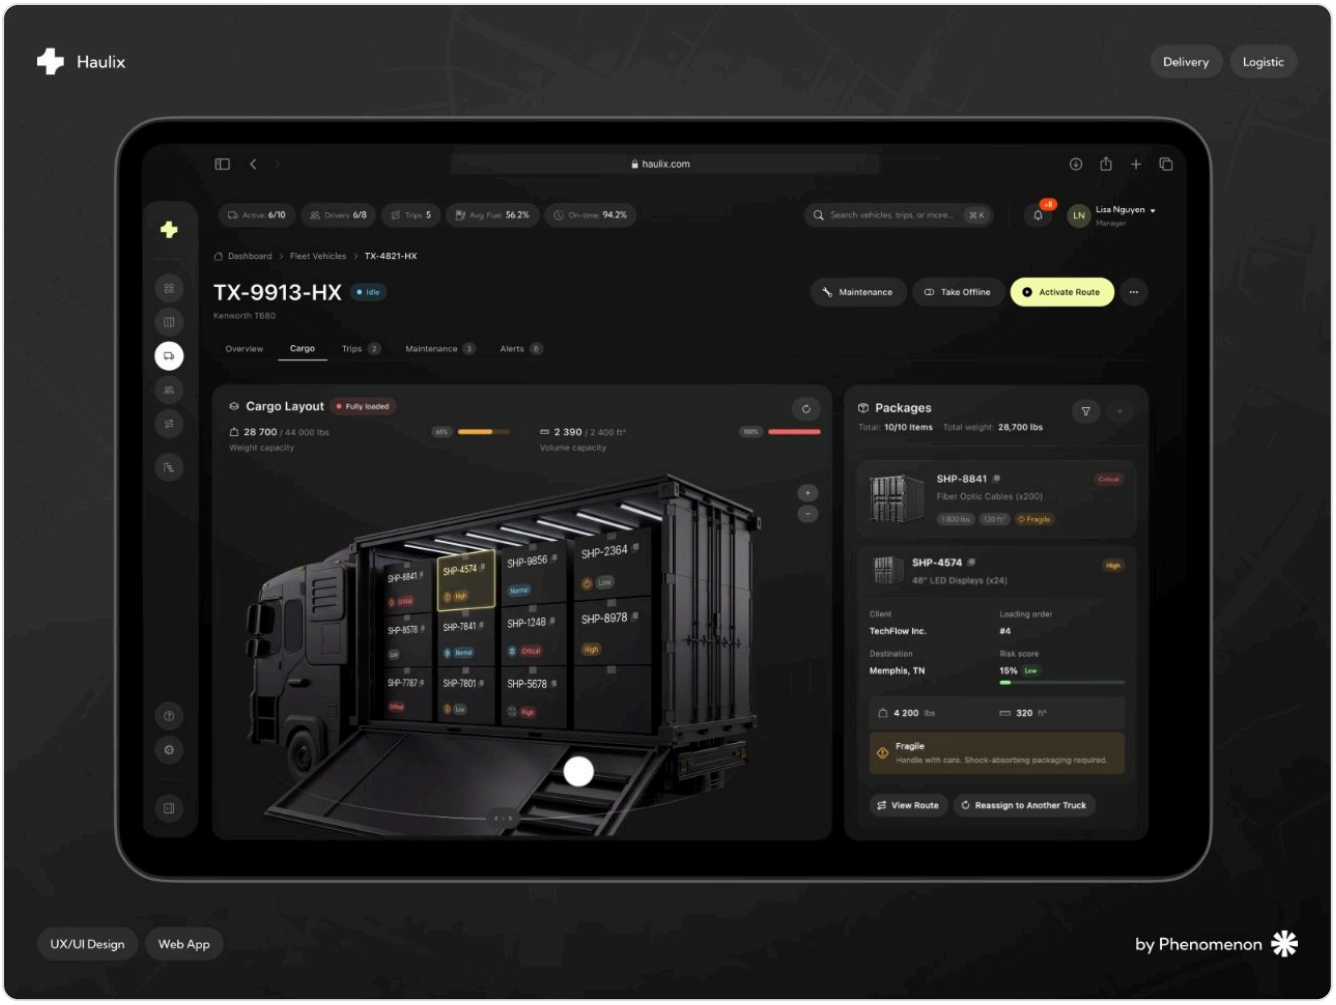

Haulix reference 1 — Operations Dashboard — copy the cards and alert style; simplify

Part	What it shows	Keep it simple
Greeting	“Good morning, Agresh” + date	
3 BigTiles	Trucks working 3 of 6 · Trips on the road 1 · Problems 4 (red)	Tap → the list
Quick buttons	New trip · Plan load · Live map · Find extra loads (slot home.actions)	2 per row on phone
Problems	ProblemCards, critical first, “Done”	Max 5, then “See all”
Recent activity · This week	6 one-line rows · SimpleBarChart “Truck space used per day” (Sample) · slot home.widgets	

7.4 Trucks and truck page (F7) · 1·Code

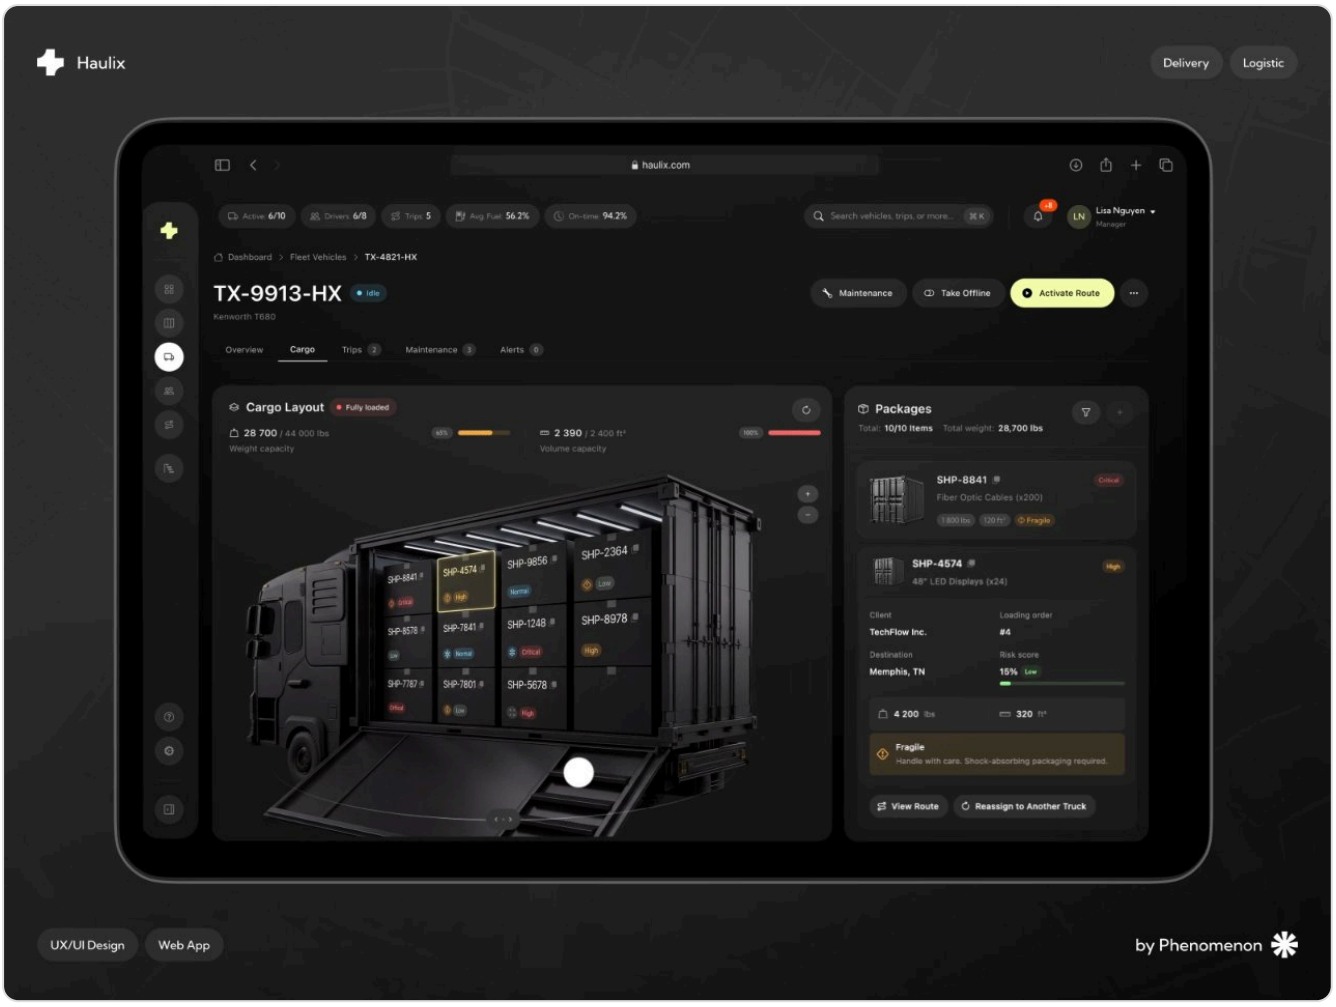

Haulix reference 7 — Board view (columns by status) with person cards — board

Haulix reference 4 — Vehicle detail with 3D truck Cargo Layout + Packages detail — truck page header and tabs

Part	What it shows	Keep it simple
List / board	Chips All · Working · Free · Repair · Off; cards: number + status, “32 ft · 15 t”, driver + call, trip chip	Board on laptop, list on phone
Truck form	Number, model, size preset, inside size (ft, cm switch), weight it can carry (t), axles, mileage, cost per km, driver, status; box preview	Presets first; advanced fields under “More details”
Truck page	Big number + status · buttons Repair / Off / Edit · lime “New trip for this truck” · tabs Overview · Trips · Problems · (slot truck.tabs)	

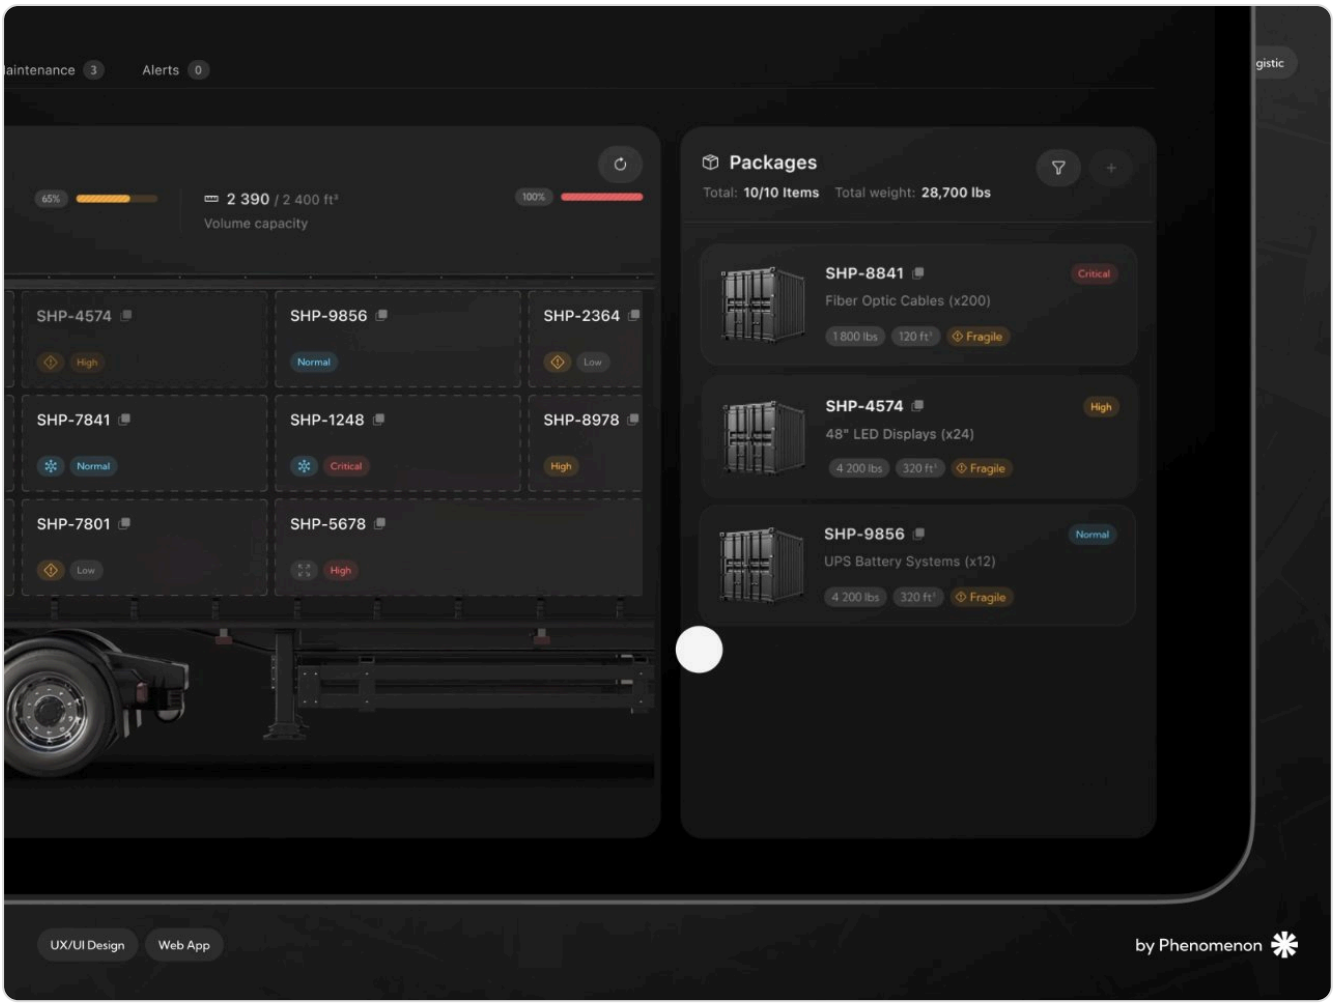

7.5 Trips, new trip, trip page with steps (F8) · 1·Code

Haulix reference 4 — Vehicle detail with 3D truck Cargo Layout + Packages detail — header, tabs, lime action

Part	What it shows	Keep it simple
Trips list	Chips Planned · Loading · On the road · Done; cards with route line, truck, departure, space used	Board on laptop
New trip	3 steps: Truck · Stops (hubs list or map, drag to reorder) · Departure + freight ₹	One question per step
Trip page	Code + status, route, big status button (Start loading / Leave / Mark delivered), NextStepCard, StepTabs 1 Cargo · 2 Load plan · 3 Loader · 4 Route · 5 Extra loads · 6 Earnings	Only built steps show; ✓ on done steps

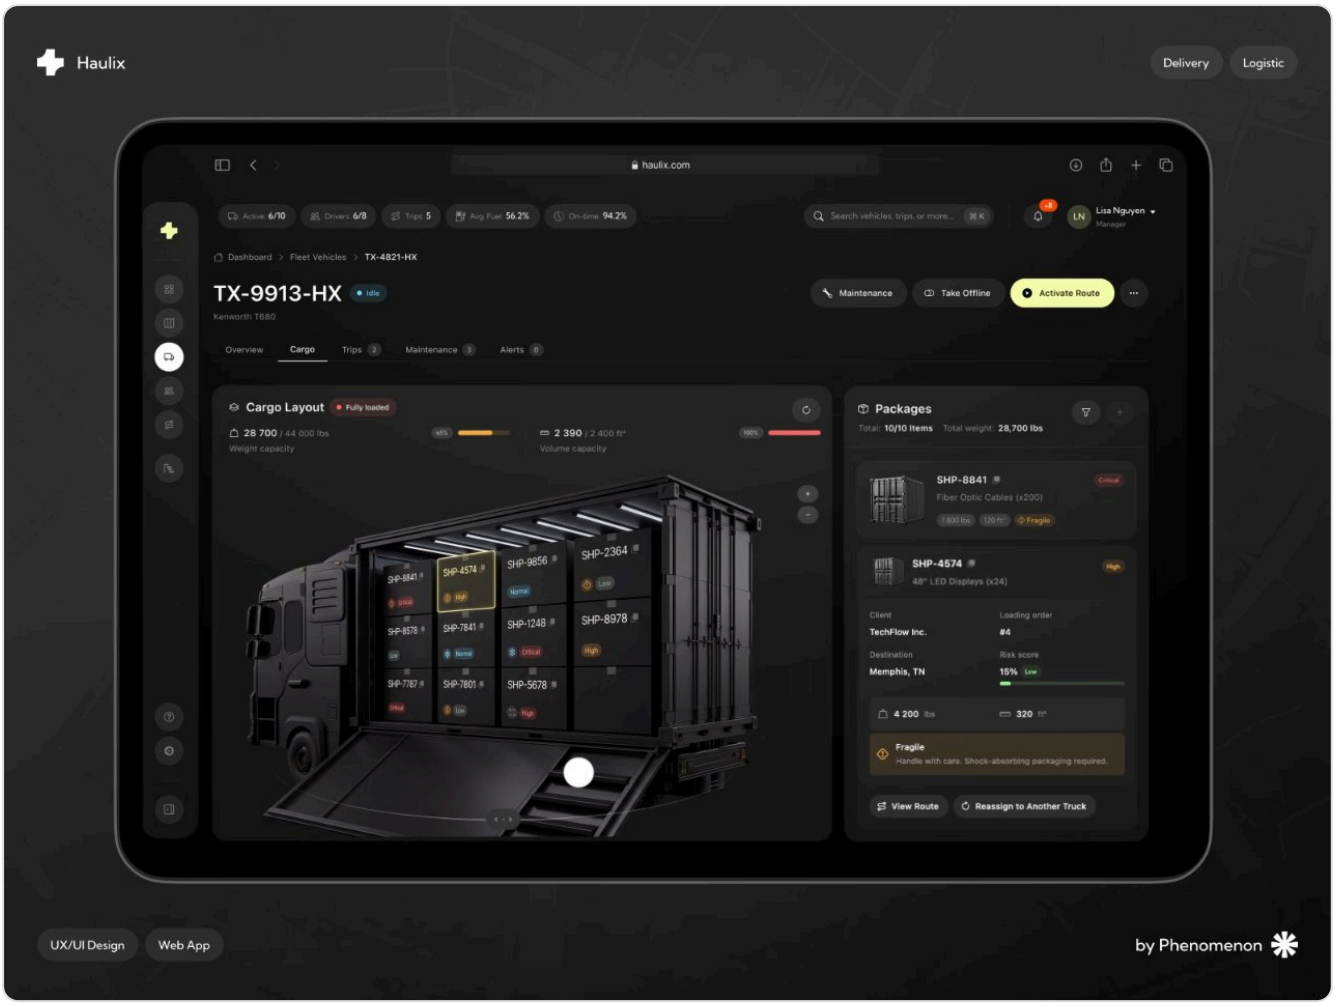

7.6 Cargo list (F9) · 1·Code

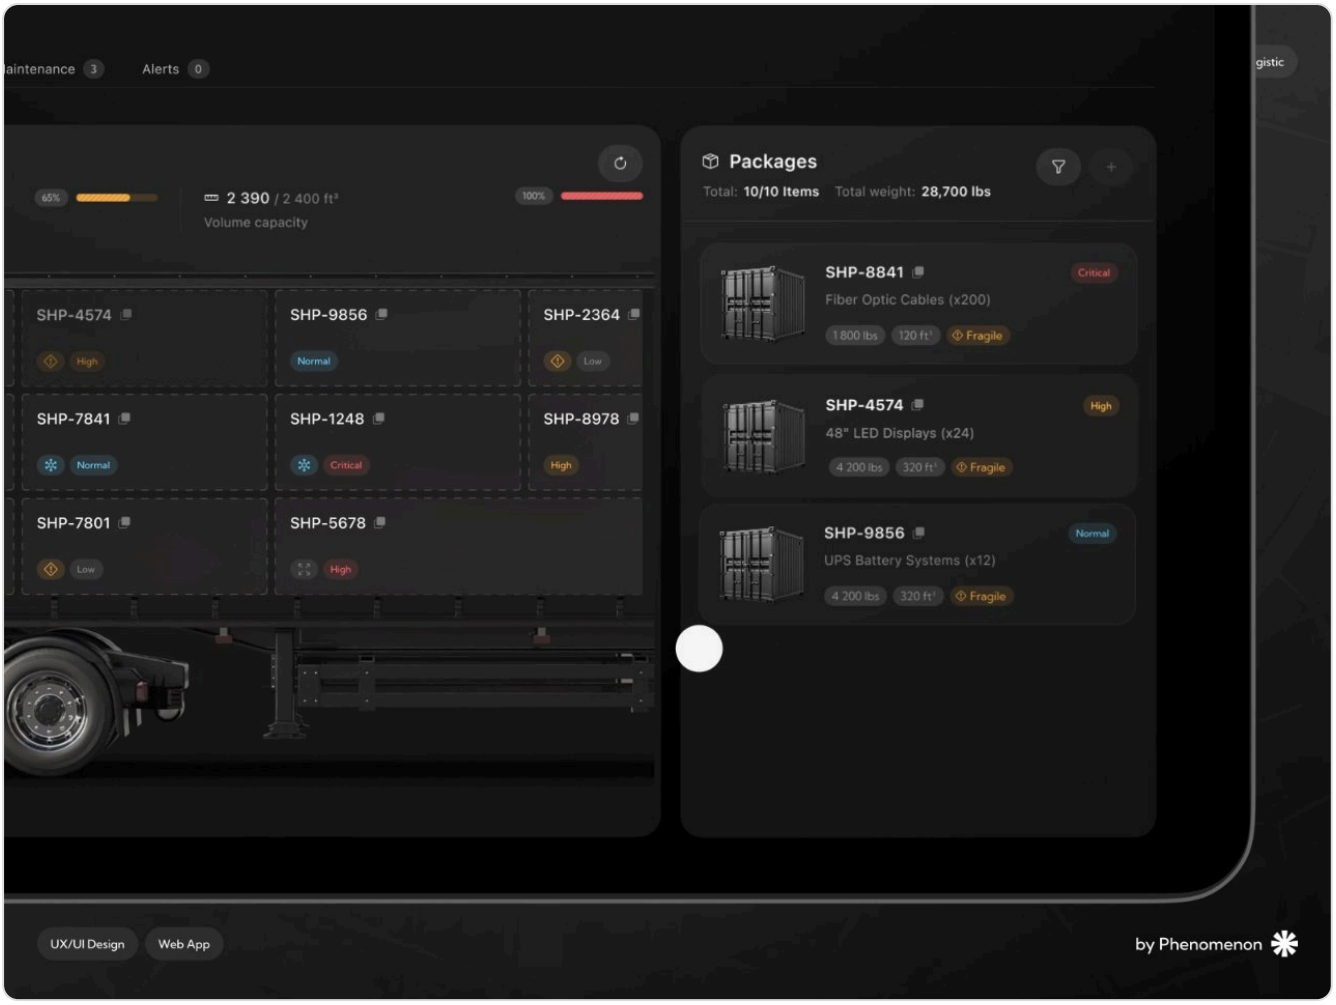

Haulix reference 5 — Cargo grid + Packages list close-up — package cards and bars

Part	What it shows	Keep it simple
Bars	“Weight 18% of truck” · “Space 34% of truck” (before packing)	
Groups	One per drop stop: StopChip + count + kg; item cards: name, size, kg × qty, icons Fragile / Keep upright / Don't stack, badges AI / Added by loader	Cards on phone, rows on laptop
Add item	Sheet: name, client, size, kg each, quantity, drop stop, 3 switches with help, priority	Main button “Add item”; camera/voice buttons appear in Phase 3

7.7 3D load plan (F11) · 1·Git

Haulix reference 4 — Vehicle detail with 3D truck Cargo Layout + Packages detail — the target

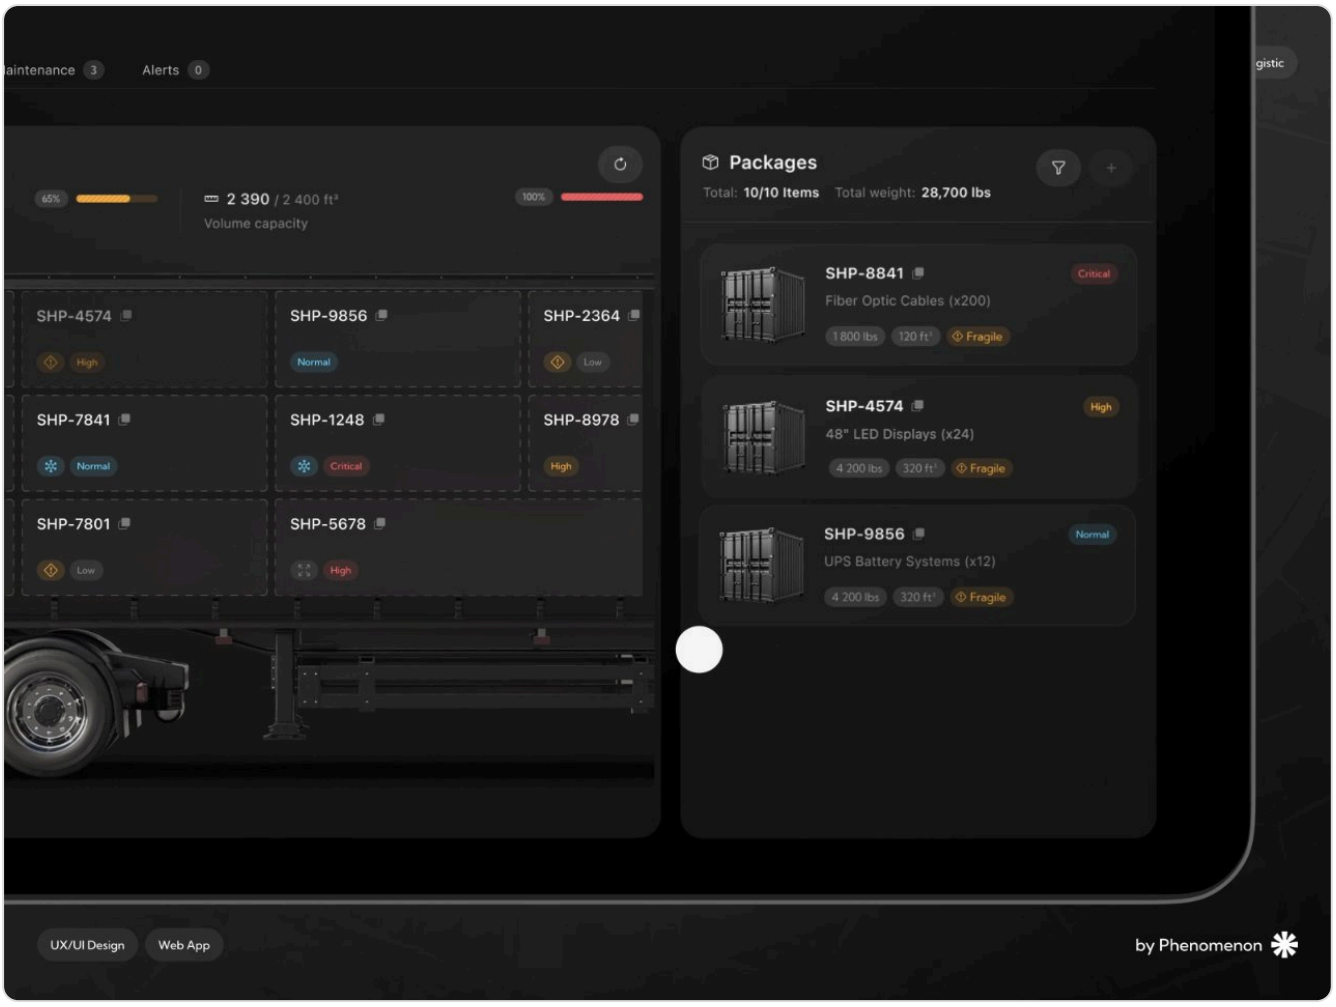

Haulix reference 5 — Cargo grid + Packages list close-up — top view cells and package cards

Part	What it shows	Keep it simple
Top	“Space used 66%” + “Weight 18%” bars; tiles Free floor 11 ft · Weight left 12.4 t · Balance OK	3 numbers only
Truck	3D truck, open doors, boxes in stop colours, “Cab side” / “Door side”, buttons 3D · From top · From side, “Play loading order”	Top/side drawings on phone low-data
Side panel	Packages by stop (expand: client, drop, kg, fragile note, Show in truck) · “Didn't fit” with plain reason + advice	Below the truck on phone
Main button	“Use this plan”	Then the NextStepCard says “Next: send to loader”

7.8 Loader step on the trip (F13) · 2·Code

Part	What it shows	Keep it simple
Link	QrCard, “Valid till Fri 6:00 pm”, Copy, lime “Send on WhatsApp”, Turn off, New link	QR big enough to scan from 1 m
Progress	“38 of 104 loaded” bar + problems from the loader	Problems in red with the step number

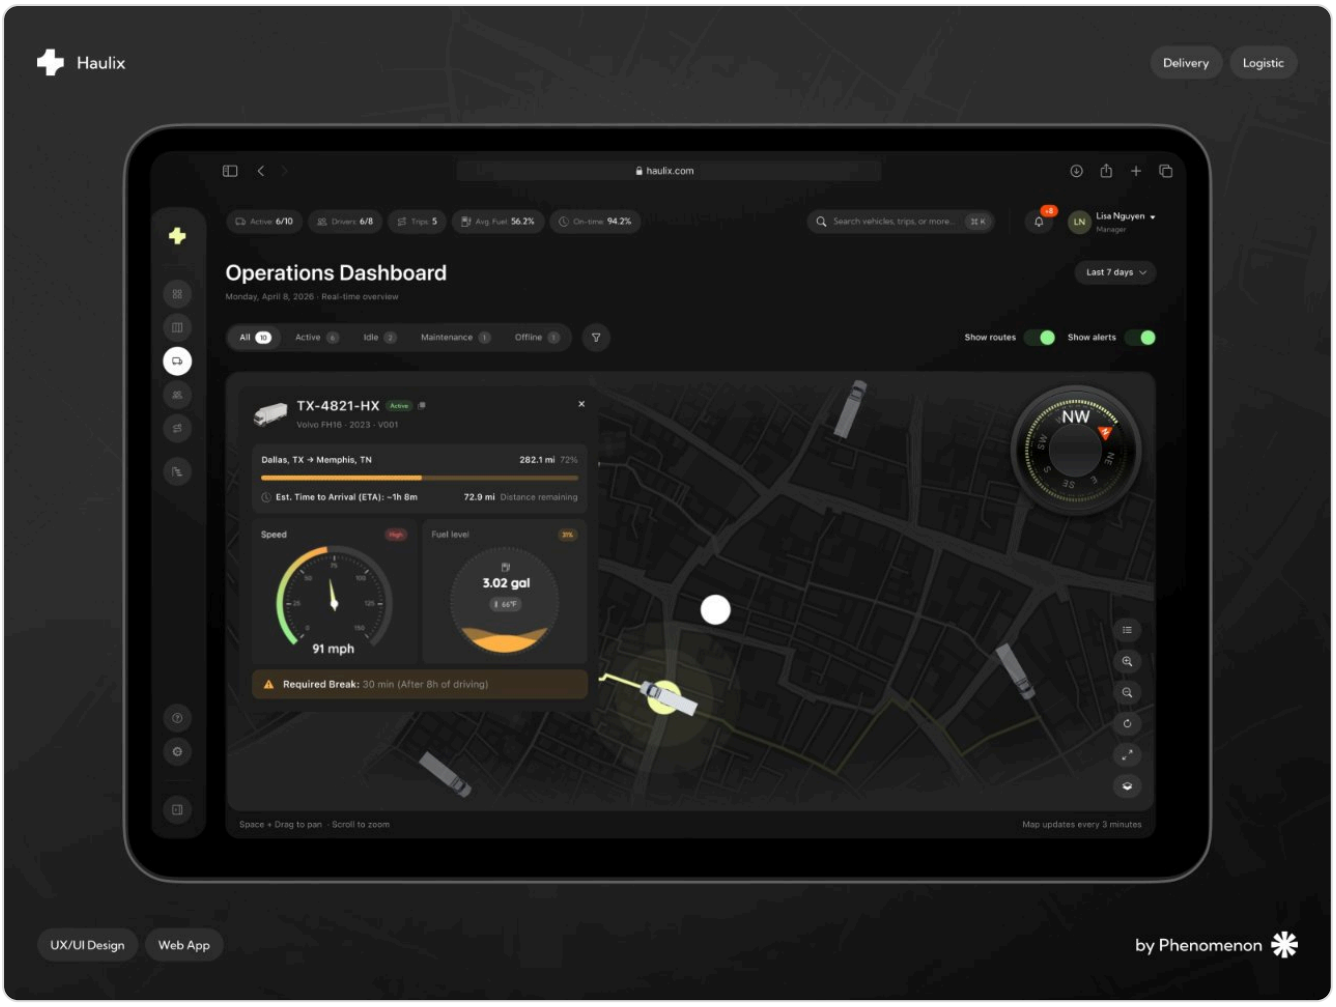

7.9 Loader page — phone, no login (F13) · 2·Code

Haulix reference 5 — Cargo grid + Packages list close-up — card style only — the loader page is much bigger and simpler

Part	What it shows	Keep it simple
Top	Truck number + trip, Hindi button, progress “Step 38 of 104”	Sticky
Step card	Item name (26 px), drop stop colour + name, size + kg, where in words “Cab side · Left · Floor”, small top + side drawing with the box highlighted	One step at a time
Buttons	“Done ✓” (lime, 56 px, full width) · “Problem” · “Back”	Problem sheet: Missing · Damaged · Different size · Other
Ends	“Truck loaded ✓” · expired: “This link has ended. Ask the owner for a new one.”	Camera/voice buttons (Phase 3) under the buttons

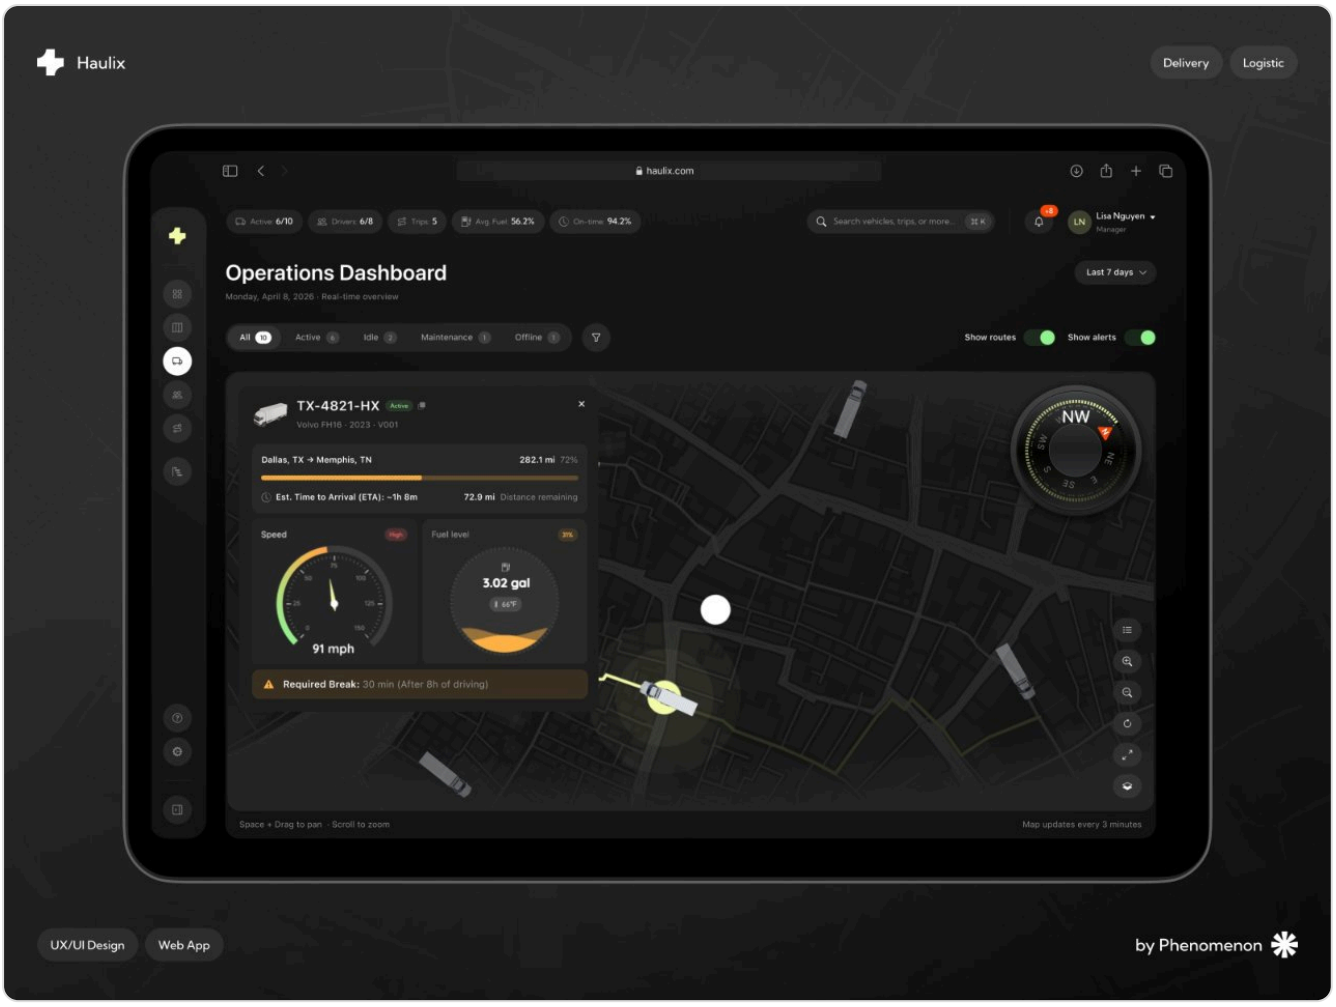

7.10 Route step (F16) · 2·Git

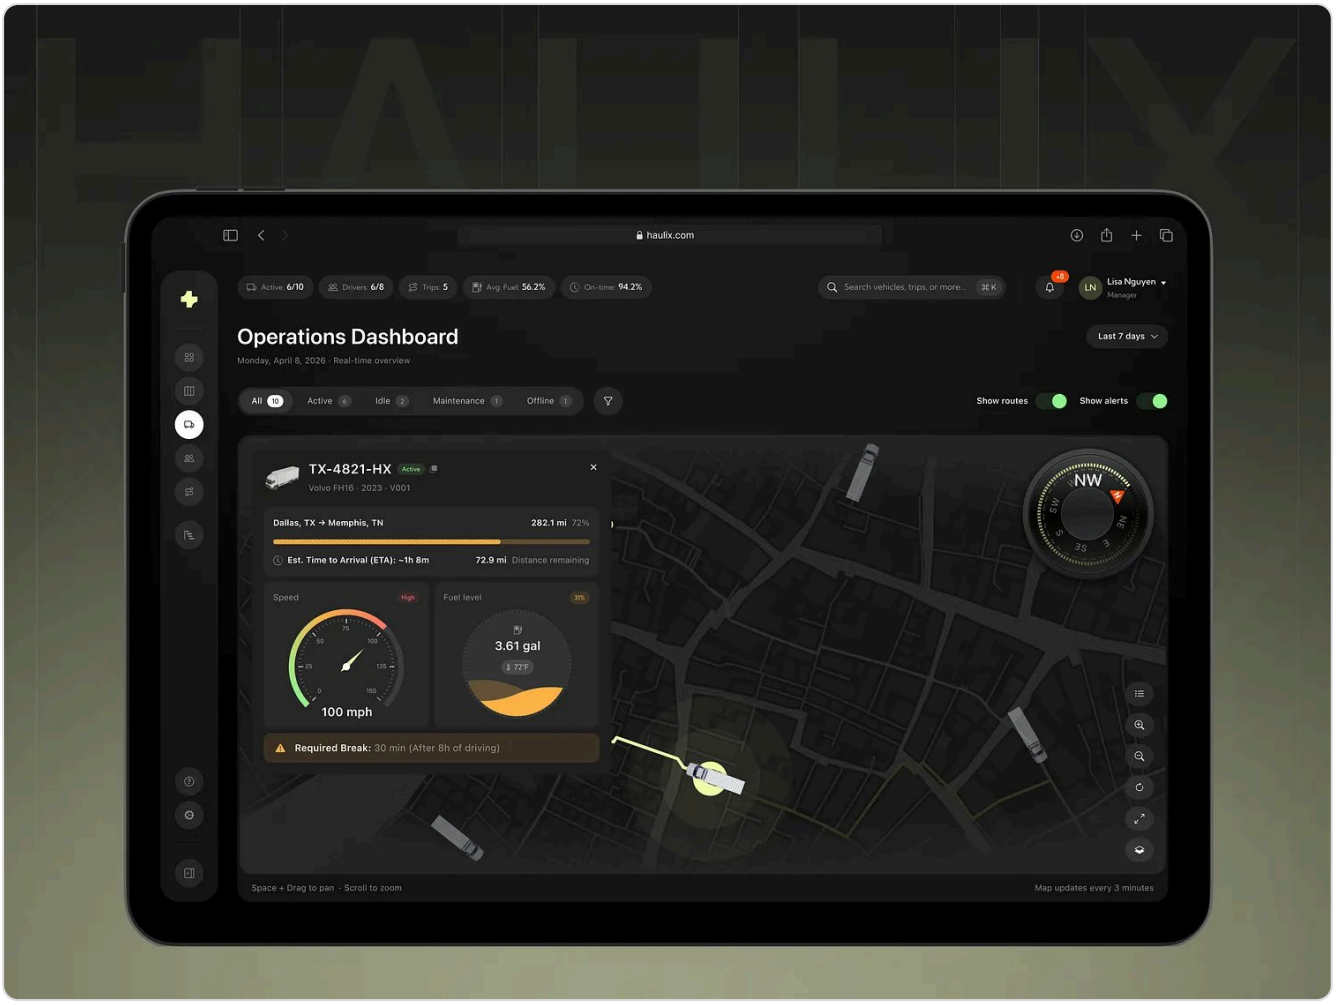

Haulix reference 6 — Live map with selected-truck card, gauges, break banner — map look

Part	What it shows	Keep it simple
Map	Lime chosen route, grey others, numbered stops, toll/dhaba icons	Icons only from zoom 8
3 route cards	Name + “Best”, km, time, total ₹ big, one cost line, “2 breaks · 14 tolls”, warning in words, Choose	Total ₹ is the hero
Journey + driver	Start → stops → breaks → waits with times; driver message preview, “Send on WhatsApp”	Hindi by default for the driver

7.11 Live map (F15) · 2·Code

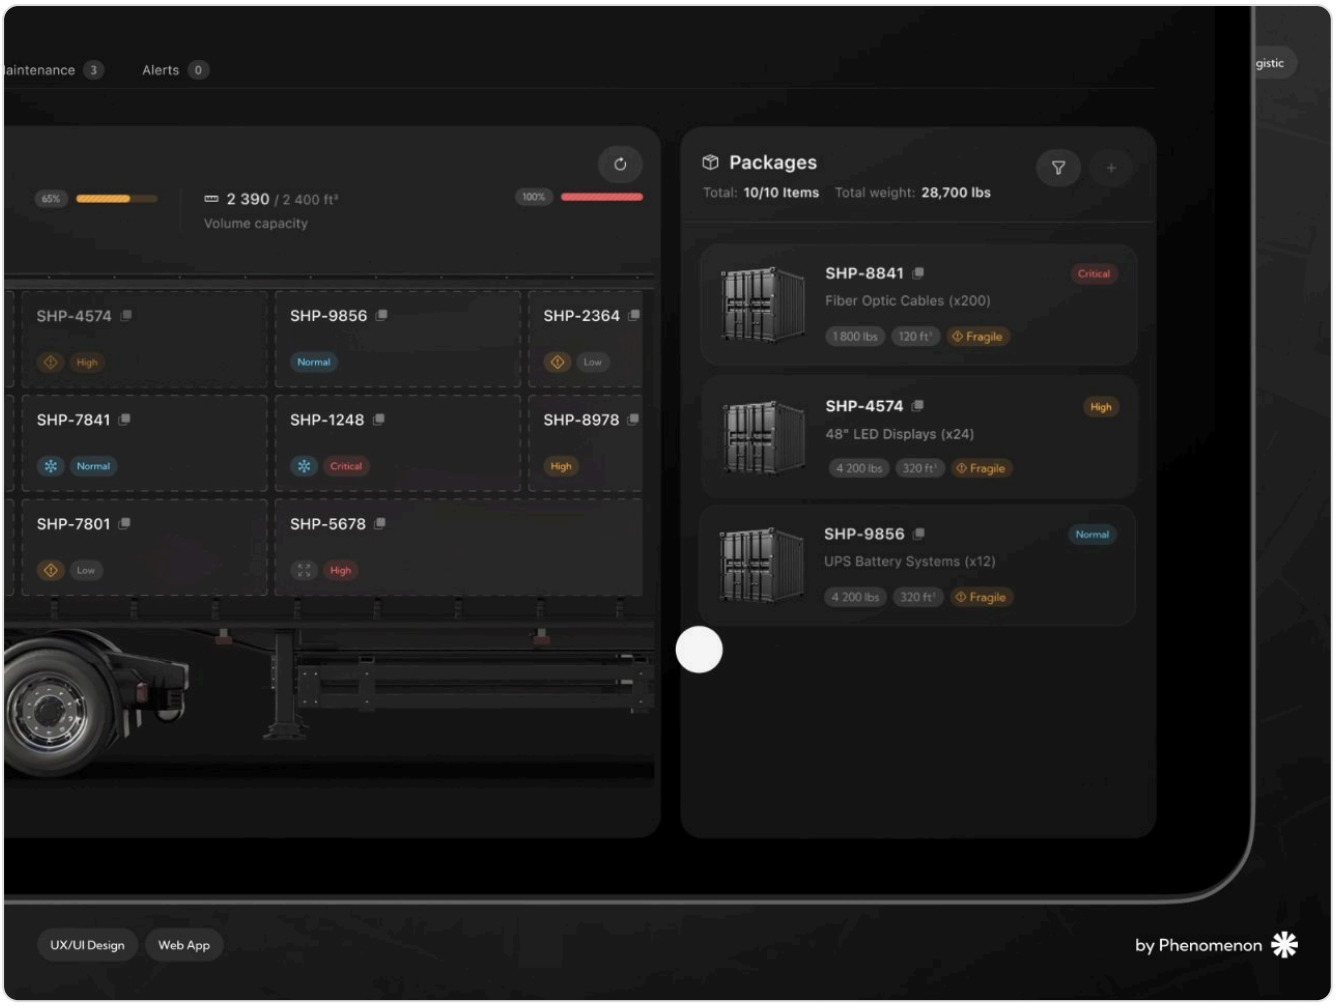

Haulix reference 6 — Live map with selected-truck card, gauges, break banner — copy the floating card, without gauges

Haulix reference 2 — Live Fleet Map — full map

Part	What it shows	Keep it simple
Map	Truck markers (lime when selected), chips with counts, Show routes / Show problems	
Truck card	Number + status, route, progress “62%”, “Arrives 2:20 pm · 118 km left”, “Speed 52 km/h · Fuel 54%”, amber break banner, call driver	No gauges; bottom sheet on phone
Footer	“Simulated — updates every 3 s”	Simulated badge always

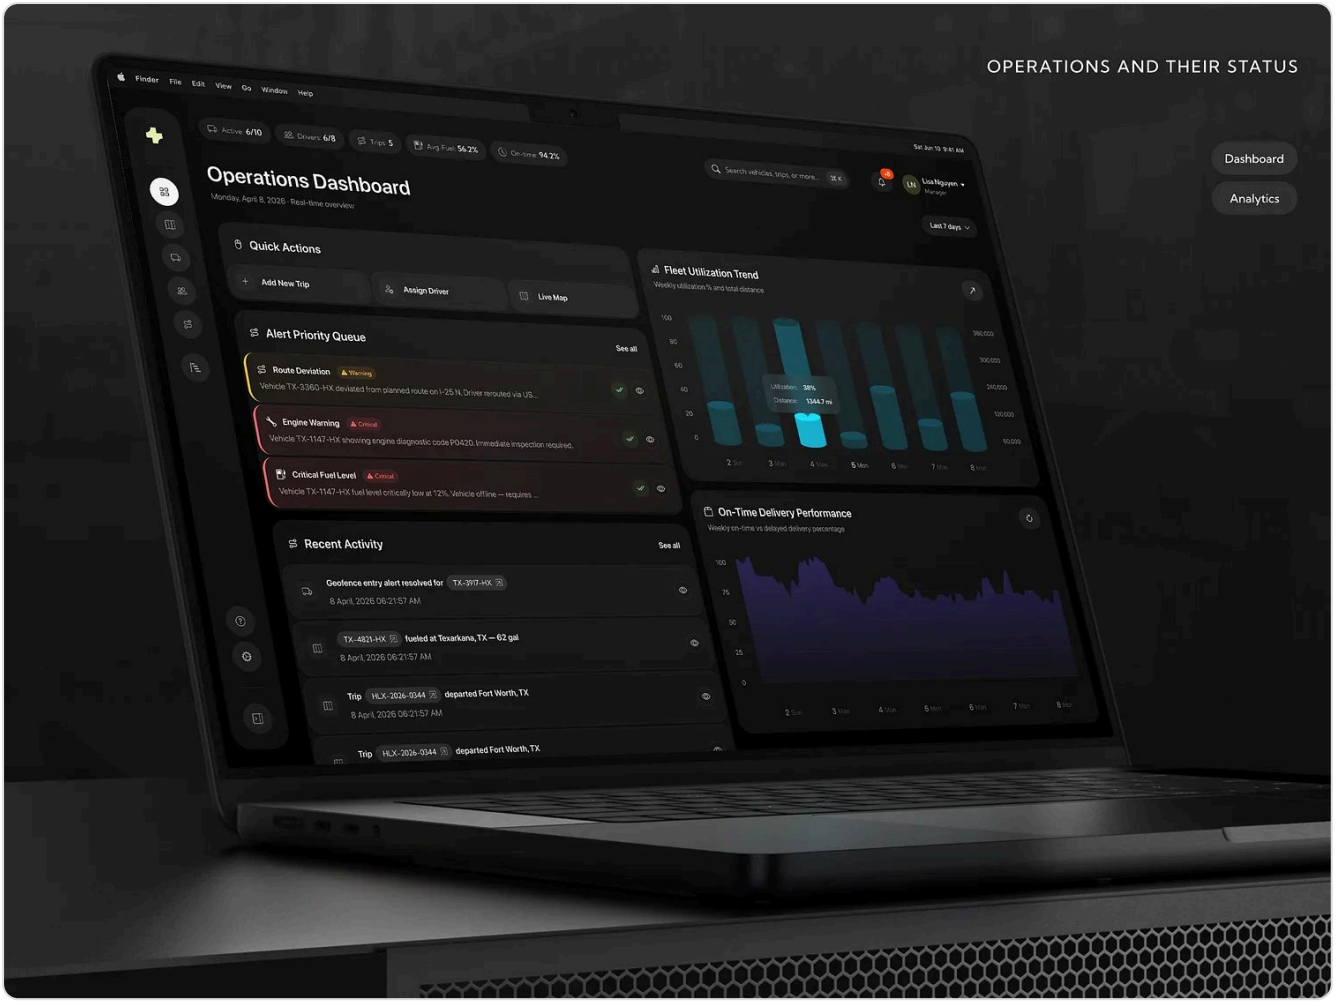

7.12 Camera and voice (F17, F18) · 3·Code

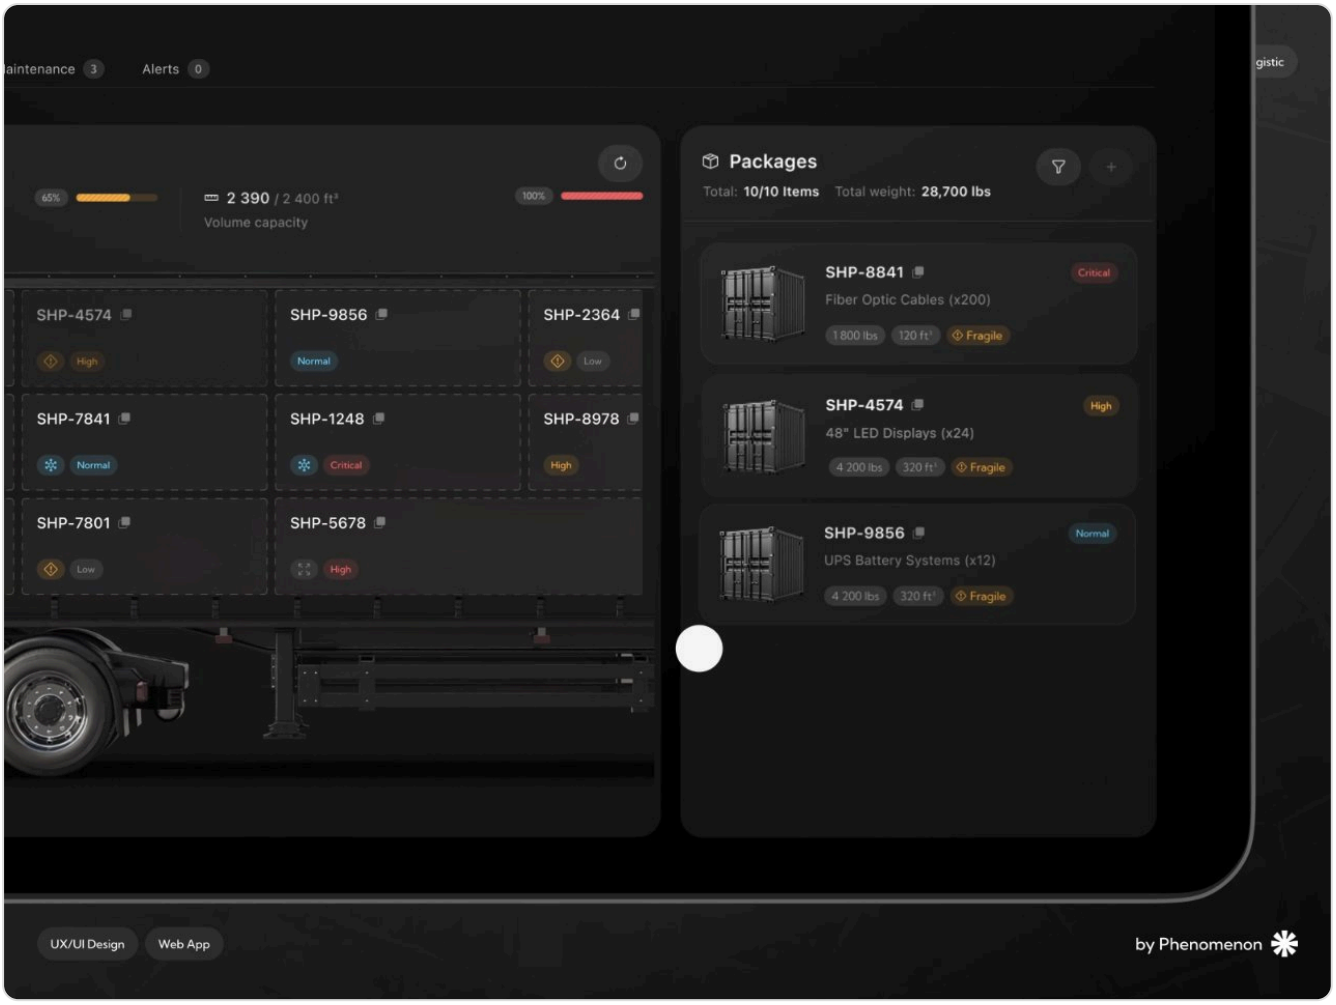

Haulix reference 5 — Cargo grid + Packages list close-up — rows and chips for Check items

Part	What it shows	Keep it simple
Camera	Tip “Keep an A4 sheet next to the boxes”, 1–3 photos, Analyse (“Reading photos… about 10 s”)	Big shutter
Voice	Big hold-to-talk mic, live text, हिंदी/English, question for missing value, “Type instead”	Mic 80 px
Check items	Editable rows, AI badge + confidence, required drop stop + kg, “Add 3 items”	Nothing saved before confirm

7.13 Extra loads step (F19) · 3·Git

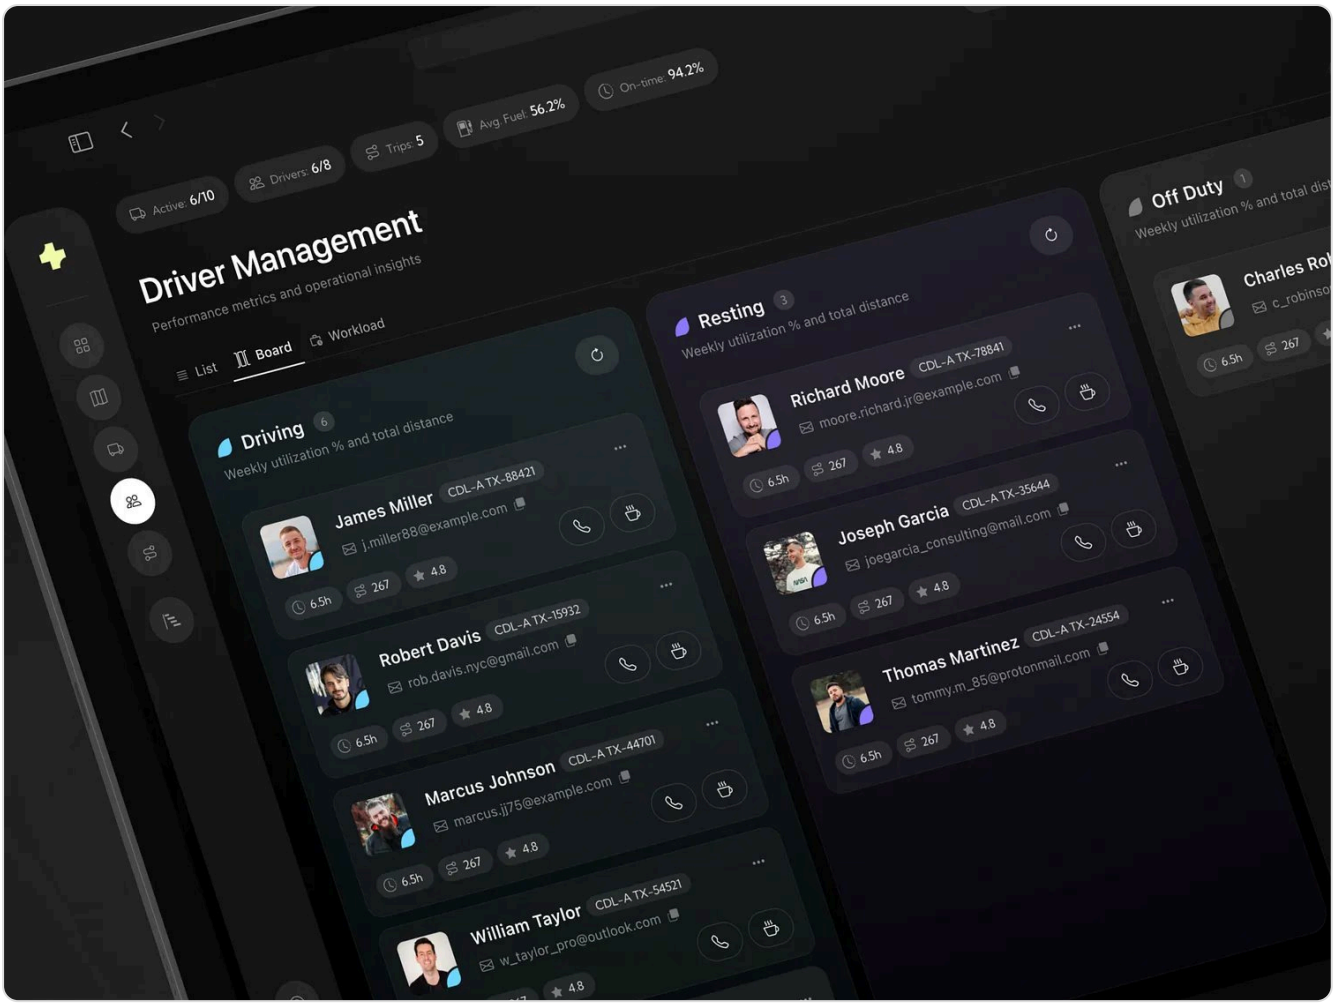

Haulix reference 1 — Operations Dashboard — tinted cards

Haulix reference 5 — Cargo grid + Packages list close-up — card style

Part	What it shows	Keep it simple
Tiles	Free floor · Weight left · Possible extra earning	3 numbers
Route strip	Simple km line with stops and an arc per load	Tap arc ↔ card
Load cards	Goods, from → to, size/weight, offer, cost, **Profit** big green, one plain reason, “See in truck”, lime “Add to trip”	Sorted by profit
Not suitable	Collapsed list with plain reasons	

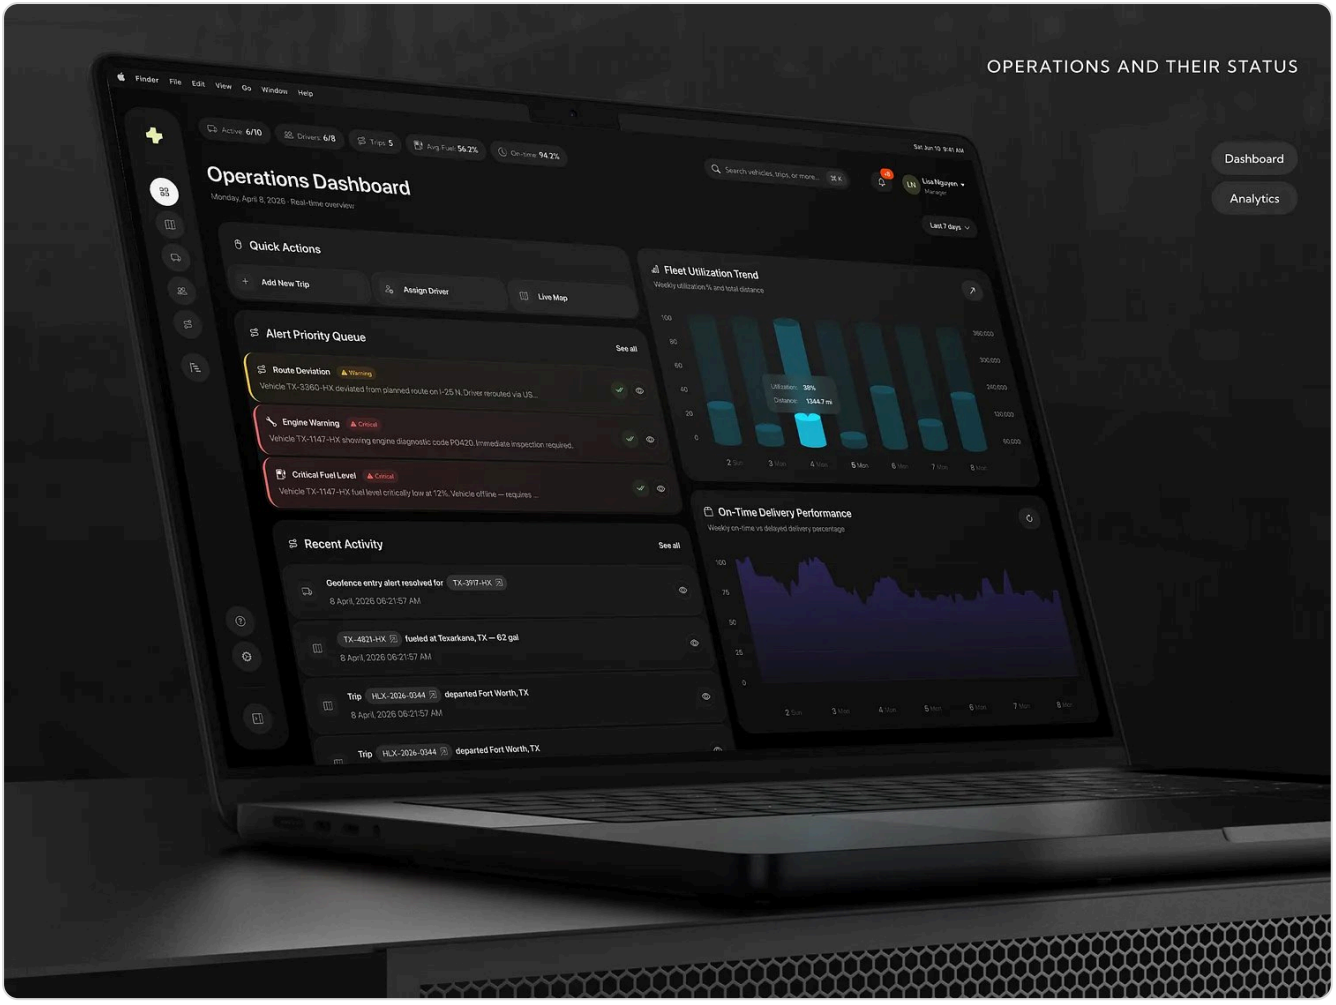

7.14 Loads marketplace (F20) · 3·Git

Haulix reference 7 — Board view (columns by status) with person cards — card list

Part	What it shows	Keep it simple
List	Chips Open · Taken · All; cards route, goods, weight, ₹, ready date, Demo/Public badge, “Find a trip”	
Post a load	Simple form, main button “Post for everyone”	Toast shows the new code

7.15 Earnings (F23) · 4·Git

Haulix reference 1 — Operations Dashboard — tiles and chart look, simplified

Part	What it shows	Keep it simple
Trip step	“You earn ₹32,450” big + “+₹10,450 from extra loads”; tiles Space used 34% → 52% · Empty floor saved 6 ft · Cost per tonne-km; freight – costs list; Share on WhatsApp	Hero number first
Earnings page	7 / 30 days chips; 3 big numbers; 2 SimpleBarCharts (money per day, space used per day); top trips	Sample badge on demo days

7.16 Settings (F6) · 0·Code

Part	What it shows	Keep it simple
Cards	My account · Company · Costs (4 main fields with help) · More settings (collapsed) · Demo data (Reset) · slot settings.sections	Sticky Save when changed

8. Map design

Layer	Value
background · land · water	#0b0d0f · #111315 · #0d1b22
roads minor · major · highway	#1d2024 · #2a2e33 · #3b3f45 with #16181b casing
labels	#8a8f98, halo #0a0a0b; cities 13–15 px; POI labels off
lite style	no buildings, no minor roads, city labels only
chosen route · other routes	accent 6 px · ink-3 4 px 70%
stop pin	30 px circle in stop colour with number
POI icons	22 px: toll ₹ (warn), dhaba, parking, fuel, checkpoint (info), no-entry (crit)
truck marker	34 px circle with truck/arrow; selected lime + soft pulse

9. 3D truck design

Part	Value
Truck	Simple cab block + see-through container (edges ink-3, 6% fill) + open door frame in accent 40%; floor grid every 50 cm
Boxes	Stop colour 85%, darker edges; fragile = amber edge; selected = lime edge
Loading progress	loaded solid · waiting 35% · problem red edge
Camera	3D (angled) default, From top, From side; double-tap a box to focus
Play loading order	boxes appear one by one in step order (no animation with reduced motion)
Performance	instanced boxes, pixel ratio ≤ 1.5 (1 in low-data), render on demand; low-data/no WebGL → top + side drawings

10. Words — glossary (use exactly these)

English	हिंदी	English	हिंदी
Home	होम	Trucks	ट्रक
Trips	ट्रिप	Map	नक्शा
Loads	लोड	Earnings	कमाई
Settings	सेटिंग्स	Problems	समस्याएँ
Stop · Drop · Pickup	स्टॉप · उतराई · लदाई	Cargo · Item	माल · सामान
Load plan	लोड प्लान	Use this plan	यह प्लान चालू करें
Send to loader	लोडर को भेजें	Done · Problem · Back	हो गया · समस्या · पीछे
Fragile · Keep upright · Don't stack	नाज़ुक · सीधा रखें · ऊपर कुछ न रखें	Cab side · Door side	केबिन की तरफ़ · दरवाज़े की तरफ़
Left · Centre · Right	बाएँ · बीच में · दाएँ	Floor · 2nd layer	फ़र्श पर · दूसरी परत
Space used	भरी जगह	Free floor	ख़ाली फ़र्श
Weight left	बचा वज़न	Balance OK	संतुलन ठीक
Route · Toll · Break	रूट · टोल · आराम	No-entry hours	नो-एंट्री समय
Extra loads	अतिरिक्त लोड	Profit	मुनाफ़ा
Best	सबसे अच्छा	Not suitable	सही नहीं
Add to trip	ट्रिप में जोड़ें	Next step	अगला कदम
Log in · Create account	लॉग इन करें · खाता बनाएँ	Link has ended	लिंक ख़त्म हो गया
Sample · Simulated	नमूना · सिम्युलेटेड	Send on WhatsApp	WhatsApp पर भेजें

Value	Show as	Example
Money	₹ with Indian grouping, no decimals	₹1,24,500
Weight	kg; tonnes from 10,000 kg (1 decimal)	2,638 kg · 15 t
Truck size	feet	32 ft × 8 ft × 8 ft
Cargo size	cm (inch switch)	95 × 32 × 38 cm
Distance · time	km · h + min	1,412 km · 26 h 40 min / 26 घं 40 मि
Date-time	IST, day month, 12-hour	30 Oct, 6:00 pm
Percent	whole numbers	66%
Digits	Latin digits in both languages	₹10,450

- Tone: short, friendly, like a helpful munshi. Say what happened and what to do: “Too heavy: 16 t, only 12.4 t left. Choose a bigger truck.”

11. States

State	Show
Loading	Grey shapes like the content

State	Show
Empty	Icon + one line + one button (“No trucks yet — Add truck”)
Error	Plain message + Retry
Offline (Phase 4)	Amber bar “No internet — showing saved data”
Permission (camera/mic)	How to allow + Type instead
Not built yet	Not shown at all

12. Badges

Badge	Where
Sample	Demo data: Home chart, demo loads, sample POIs, analytics
Simulated	Live map positions
AI	Cargo from camera/voice
Estimated · Approximate	Tolls, ETAs, detours before exact routing · extra loads without a chosen route
Public · Added by loader	Loads posted for everyone · cargo from the loader link

13. Design check — before “ready to merge” (MANDATORY)

Agent Git checks by code review and fixture mode; Agent Code checks the real app on laptop (1280 px) and phone (375 px) at the merge.

- ☐ Section 1 rules: one main button, big text and buttons, plain words, icon + word, ≤ 3 numbers per card, next step visible.
- ☐ Matches its Haulix reference picture (style), simplified as section 2 says.
- ☐ Only tokens and components; dark only; no Haulix name.
- ☐ Loading, empty and error states present.
- ☐ Hindi button switches everything on the screen, incl. demo data; nothing overflows at 375 px.
- ☐ Numbers, dates and units from the format helpers.
- ☐ Badges where section 12 says.
- ☐ Contrast ≥ 4.5:1, focus ring visible, labels on icon buttons, works with 200% zoom.
- ☐ No dead buttons or steps for unbuilt features.
