# Spareway - Data Sources and Verification

Team Bravo · MU20 Hackathon 2026 · Route database for Manesar → Jaipur → Ahmedabad → Mumbai (NH48) and nearby routes

Prepared by Vansh · Sources checked on 29 October 2026

## 1. Files covered

| File | Rows | Contents |
|---|---|---|
| **tolls.csv** | 55 | Toll plazas with rates, coordinates, police, hospital, helplines, facilities |
| **checkpoints.csv** | 59 | Weighbridges, barrier-free tolls, state border posts |
| **no_entry_hours.csv** | 15 | Truck no-entry time windows by city |
| **driving_rules.csv** | 19 | Legal working hours, rest, speed limits, toll payment rules |
| **dhabas_halts.csv** | 20 | Dhabas, restaurants and rest stops |
| **diesel_prices.csv** | 42 | Diesel price by district |
| **driver_pay.csv** | 12 | Legal minimum wages and market driver pay |

## 2. How every source was verified

**Every source in this document was opened and read on 29 October 2026.** No number was taken from a search-result snippet alone or from memory. Each value in the CSV files was compared with the page it came from.

**Each source is graded by how authoritative it is: A** = Official (government / regulator); **B** = Official data mirror or price aggregator; **C** = Established news media; **D** = Industry guide, compliance site, job portal or travel blog.

**Cross-checks between independent sources:** toll plaza coordinates from NHAI map pins were compared with the official NPCI Plaza Master (they matched for every plaza listed in both, except Bhatia, where the NPCI value was used). Jaipur and Mumbai diesel prices were confirmed on two separate pages. Gujarat wages were checked for both the April and October 2026 revisions, and the newer one was used.

**Why level B is used for toll rates:** NHAI's own Toll Information System (tis.nhai.gov.in) blocks automated access. Goodreturns republishes the same NHAI plaza records (plaza codes, fee dates, rate tables, helplines). The plaza codes were confirmed against NPCI's official list.

**Missing values are never guessed.** Where a source did not give a value, the CSV says *not_listed* or *not_stated*.

## 10. Corrections made during verification

• Barrier-free tolling at Manoharpur, Daulatpura and Choryasi: status date changed from 1 Oct 2026 to 30 Sep 2026, the date on the source page.

• UPI-without-FASTag rule (1.25x): start date changed from 10 Apr 2026 to 15 Nov 2025, as stated by the source. 10 Apr 2026 is when cash was stopped, which is a separate rule.

• Bhatia toll plaza: the two coordinate sources disagreed, so the official NPCI value was used.

• Chandwad toll plaza was left out because its source page gave an impossible fee date (9 Dec 2026).

• Ghoti toll plaza: the source repeated Arjunali's police station, so police and hospital are marked not_listed.

• Ahmedabad-Vadodara expressway and Mumbai-Pune plazas were left out of the toll rates because their source rate tables were empty.

## 11. Known limits - re-check before the pitch

• **Toll rates** come from a mirror of NHAI's records (level B). For the final pitch, spot-check two or three plazas by hand on tis.nhai.gov.in, which blocks automated reading.

• **Manoharpur fee date:** the source page shows 20 Jul 2025 next to a revision due 31 Mar 2027 and FY 2026-27 pass rates; the CSV uses 20 Jul 2026 as the likely correct year.

• **Dahisar rates** are from news reports. The articles themselves say MSRDC's own notice was not found. The multi-axle rate of Rs 225 was applied to all trucks of 3 or more axles.

• **Vadodara no-entry hours** are from a 2020 report and may have changed. No current published rule was found for Jaipur; NH48 bypasses the city.

• **Gujarat Police border checks** are reported for border districts; the source does not name exact post sites.

• **Rajasthan minimum wage**: the newest rate found is from Jan 2023. Maharashtra's rate depends on the type of business, which the source does not state.

• **Dhaba list** comes from travel guides (level D). No official register of dhabas exists; check each on a map before the demo.

• **Diesel prices** change daily. Each row carries the date shown by the source.
